Preparing for Shooting

Insert the Batteries and Memory Card

1. Open the battery-chamber/memory card slot cover.
2. Insert the batteries and memory card.
3. Close the battery-chamber/memory card slot cover.

Applicable Batteries

- The camera is compatible with EN-EL20 Li-ion batteries.

Removing the Memory Card

- The camera can only be turned off or new images can be recorded when no data is being written to the memory card.
- Perform the following steps when the memory card is locked (when the access lamp is on or blinking).
- Turn off the camera.
- Open the memory card slot cover.
- Press the memory card to remove it from the card slot.

Using the Camera

Shooting with Scene Auto Selector Mode

1. Choose Auto mode.
2. Press the shutter-release button halfway.
3. When the indicator showing the number of exposures remaining or the maximum movie length flashes, the camera is unable to focus. Modify the composition and try pressing the shutter-release button halfway again.

Shooting Features

Changing the Shooting Mode

The following shooting modes are available.

- Scene auto selector
- Auto
- Scene mode

Scene auto selector
Camera settings are applied according to the scene that you select.

- Special effects
Settings can be added or deleted during shooting.

- Night portrait
When you select a timing function, you can take an image during a time delay without pressing the shutter-release button ( timer mode).

- Night scene
When you select a timing function, you can take a series of images during a time delay without pressing the shutter-release button ( timer mode).

- Scenery
General shooting
Settings can be added to the shooting conditions and the type of shot you want to take.

- Press the shooting mode button in the shooting screen.
- Use the multi selector \( \downarrow \) to select a shooting mode and press the button.

Recording and Playing Back Movies

1. Display the shooting screen.
2. Press the \( \text{Movie-record} \) button to start movie recording.
3. Press the \( \text{Movie-record} \) button again to stop recording.

Using ViewNX 2

Install ViewNX 2

Download ViewNX 2 from the Nikon website for your region.

Installing ViewNX 2

Follow two steps to install ViewNX 2.

1. Follow the instructions on the ViewNX 2 CD-ROM.
2. Double-click the ViewNX 2 icon.

Transferring Images to the Computer

1. Choose how images will be copied to the computer.
2. Press the Start button in ViewNX 2.
3. Terminate the connection.

Troubleshooting

If the camera fails to function correctly, check the list of common problems below and consult with your Nikon-authorized service representative.

The camera is not turned on.

- Check that the batteries and/ or memory card are inserted.
- Check that the lens is attached.
- Check that the camera is set to the initial settings.
- Press the power switch to turn the camera off and on again.
- When the camera turns on, press the center of the multi selector to turn the camera off.

The camera becomes hot.

- The camera or batteries have become too cold and cannot operate properly.
- The camera will automatically turn off to save power (auto off function).
- Wait until the camera has cooled, and then try turning it on again.

The battery consumption is high.

- Certain menu options cannot be set depending on the current shooting mode or the current menu options.
- If the camera is connected to a computer, the remaining battery power will be affected by the power source.

The camera or the accessory is hot.

- The camera or the accessory is hot when the camera or accessories are being used. This is not a malfunction.

- Certain menu options cannot be set depending on the current shooting mode or the current menu options.
- If the camera is connected to a computer, the remaining battery power will be affected by the power source.

The camera becomes hot.

- Check that the camera is not turned on for an extended period of time. It is not a malfunction.

- Certain menu options cannot be set depending on the current shooting mode or the current menu options.
- If the camera is connected to a computer, the remaining battery power will be affected by the power source.

The camera or the accessory is hot.

- Check that the camera is not turned on for an extended period of time. It is not a malfunction.

About the Warnings

- Do not use memory cards or lenses included with the product for reproduction, lent, hired, or rented. The resale of memory cards or lenses included with the product is prohibited by law, and may result in a fine or imprisonment.
- Nikon reserves the right to change the contents of the package without prior notice.
- Nikon will not be held liable for damages or lost profits that may result from product malfunction.

Notice in the United States: When worn, do not use the camera in areas designated with this symbol. Do not use or store this device in the vicinity of electronic equipment.

Notice for Customers in the United States

Federal Communications Commission (FCC) Radio Frequency Interference Statement

This device has been tested and found to comply with Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Notice in Canada

This Class B digital apparatus complies with Canadian ICES-003.

Trademark Information

- Adobe is a registered trademark of Adobe Systems Incorporated in the United States and/or other countries.
- PictBridge is a trademark.
- This product was tested and confirmed to comply with all applicable EC Directives.

Caring for the Product

Cleaning the Camera

- Do Not Drop
- Do Not Bend
- Keep Away from Strong Magnetic Fields
- Exposure to external magnetic fields could impair the permanent magnetism of the lens and cause defects in the images recorded.

Notes About the Monitor

- The monitor of this camera can be damaged by intense light, such as sunlight. When using the camera at the beach or other bright locations, be careful not to expose the monitor to direct sunlight.
- The monitor may be damaged if exposed to low-temperature conditions.

Memory Cards

- Formatting Memory Cards
- Formatting is not needed before using a newly purchased memory card. Formatting is recommended whenever using memory cards made by other manufacturers.

Approved Memory Cards

The following memory cards have been tested and approved for use with your Nikon digital camera.

- SD cards: SD, SDHC, SDXC
- MicroSD cards: MicroSD, MicroSDHC, MicroSDXC

Disposing of Digital Storage Devices

- Do not dispose of digital storage devices such as memory cards in a household waste collection system.
- Contact your local waste disposal authority to learn how to dispose of digital storage devices responsibly.
