Thank you for purchasing the Nikon COOLPIX S3600 digital camera. Before using the camera, please read the information in “For Your Safety” (viii-x) and familiarize yourself with the information provided in this manual. After reading, please keep this manual handy and refer to it to enhance your enjoyment of your new camera.
About This Manual

If you want to start using the camera right away, see “The Basics of Shooting and Playback” (¹⁰).

To learn about the parts of the camera and information that is displayed in the monitor, see “Parts of the Camera” (¹¹).

- SD, SDHC, and SDXC memory cards are referred to as “memory cards” in this manual.
- The setting at the time of purchase is referred to as the “default setting.”
- The names of menu items displayed in the camera monitor, and the names of buttons or messages displayed on a computer monitor appear in bold.
- In this manual, images are sometimes omitted from monitor display samples so that monitor indicators can be more clearly shown.
- Illustrations and monitor content shown in this manual may differ from the actual display.
Information and Precautions

Life-Long Learning

As part of Nikon’s “Life-Long Learning” commitment to ongoing product support and education, continually updated information is available online at the following sites:

- For users in the U.S.A.: http://www.nikonusa.com/
- For users in Europe and Africa: http://www.europe-nikon.com/support/
- For users in Asia, Oceania, and the Middle East: http://www.nikon-asia.com/

Visit these sites to keep up-to-date with the latest product information, tips, answers to frequently asked questions (FAQs), and general advice on digital imaging and photography. Additional information may be available from the Nikon representative in your area. Visit the site below for contact information.

http://imaging.nikon.com/

Use Only Nikon Brand Electronic Accessories

Nikon COOLPIX cameras are designed to the highest standards and include complex electronic circuitry. Only Nikon brand electronic accessories (including battery chargers, batteries, Charging AC Adapter, and AC adapters) certified by Nikon specifically for use with this Nikon digital camera are engineered and proven to operate within the operational and safety requirements of this electronic circuitry.

The use of non-Nikon electronic accessories could damage the camera and may void your Nikon warranty.

The use of third-party rechargeable Li-ion batteries not bearing the Nikon holographic seal could interfere with normal operation of the camera or result in the batteries overheating, igniting, rupturing, or leaking.

For more information about Nikon brand accessories, contact a local authorized Nikon dealer.

Holographic seal: Identifies this device as an authentic Nikon product.

Before Taking Important Images

Before taking images on important occasions (such as at weddings or before taking the camera on a trip), take a test shot to ensure that the camera is functioning normally. Nikon will not be held liable for damages or lost profits that may result from product malfunction.
About the Manuals

• No part of the documentation included with this product may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language in any form, by any means, without Nikon’s prior written permission.

• Nikon reserves the right to change the specifications of the hardware and software described in the documentation at any time and without prior notice.

• Nikon will not be held liable for any damages resulting from the use of this product.

• While every effort was made to ensure that the information in the documentation is accurate and complete, we would appreciate it were you to bring any errors or omissions to the attention of the Nikon representative in your area (address provided separately).

Notice Concerning Prohibition of Copying or Reproduction

Note that simply being in possession of material that was digitally copied or reproduced by means of a scanner, digital camera or other device may be punishable by law.

• Items prohibited by law from being copied or reproduced

Do not copy or reproduce paper money, coins, securities, government bonds or local government bonds, even if such copies or reproductions are stamped “Sample.” The copying or reproduction of paper money, coins, or securities which are circulated in a foreign country is prohibited. Unless the prior permission of the government was obtained, the copying or reproduction of unused postage stamps or post cards issued by the government is prohibited. The copying or reproduction of stamps issued by the government and of certified documents stipulated by law is prohibited.

• Cautions on certain copies and reproductions

The government has issued cautions on copies or reproductions of securities issued by private companies (shares, bills, checks, gift certificates, etc.), commuter passes or coupon tickets, except when a minimum of necessary copies are to be provided for business use by a company. Also, do not copy or reproduce passports issued by the government, licenses issued by public agencies and private groups, ID cards and tickets, such as passes and meal coupons.

• Comply with copyright notices

The copying or reproduction of copyrighted creative works such as books, music, paintings, woodcut prints, maps, drawings, movies and photographs is governed by national and international copyright laws. Do not use this product for the purpose of making illegal copies or to infringe copyright laws.
Disposing of Data Storage Devices

Please note that deleting images or formatting data storage devices such as memory cards or built-in camera memory does not completely erase the original image data. Deleted files can sometimes be recovered from discarded storage devices using commercially available software, potentially resulting in the malicious use of personal image data. Ensuring the privacy of such data is the user’s responsibility.

Before discarding a data storage device or transferring ownership to another person, erase all data using commercial deletion software, or format the device and then completely refill it with images containing no private information (for example, images of empty sky). Be sure to also replace any images selected for the Select an image option in the Welcome screen setting (73). Care should be taken to avoid injury or damage to property when physically destroying data storage devices.
To prevent damage to your Nikon product or injury to yourself or to others, read the following safety precautions in their entirety before using this equipment. Keep these safety instructions where all those who use the product will read them. The consequences that could result from failure to observe the precautions listed in this section are indicated by the following symbol:

This icon marks warnings, information that should be read before using this Nikon product, to prevent possible injury.

**WARNINGS**

⚠️ **Turn off in the event of malfunction**
Should you notice smoke or an unusual smell coming from the camera or Charging AC Adapter, unplug the Charging AC Adapter and remove the battery immediately, taking care to avoid burns. Continued operation could result in injury. After removing or disconnecting the power source, take the equipment to a Nikon-authorized service representative for inspection.

⚠️ **Do not disassemble**
Touching the internal parts of the camera or Charging AC Adapter could result in injury. Repairs should be performed only by qualified technicians. Should the camera or Charging AC Adapter break open as the result of a fall or other accident, take the product to a Nikon-authorized service representative for inspection, after unplugging the product and/or removing the battery.

⚠️ **Do not use the camera or Charging AC Adapter in the presence of flammable gas**
Do not use electronic equipment in the presence of flammable gas, as this could result in explosion or fire.

⚠️ **Handle the camera strap with care**
Never place the strap around the neck of an infant or child.

⚠️ **Keep out of reach of children**
Particular care should be taken to prevent infants from putting the battery or other small parts into their mouths.
Do not remain in contact with the camera, battery charger, or AC adapter for extended periods while the devices are on or in use

Parts of the devices become hot. Leaving the devices in direct contact with the skin for extended periods may result in low-temperature burns.

Do not leave the product where it will be exposed to extremely high temperatures, such as in an enclosed automobile or in direct sunlight

Failure to observe this precaution could cause damage or fire.

Observe caution when handling the battery

The battery may leak, overheat or explode if improperly handled. Observe the following precautions when handling the battery for use in this product:

- Before replacing the battery, turn the product off. If you are using the Charging AC Adapter/AC adapter, be sure it is unplugged.
- Use only a Rechargeable Li-ion Battery EN-EL19 (included). Charge the battery by using a camera that supports battery charging. To perform this operation, use either Charging AC Adapter EH-70P (included) or the Charge by computer function. The Battery Charger MH-66 (available separately) is also available to charge the battery without using a camera.
- When inserting the battery, do not attempt to insert it upside down or backwards.
- Do not short or disassemble the battery or attempt to remove or break the battery insulation or casing.
- Do not expose the battery to flame or to excessive heat.
- Do not immerse in or expose to water.
- Put the battery in a plastic bag, etc. in order to insulate it before transporting. Do not transport or store with metal objects such as necklaces or hairpins.
- The battery is prone to leakage when fully discharged. To avoid damage to the product, be sure to remove the battery when no charge remains.
- Discontinue use immediately should you notice any change in the battery, such as discoloration or deformation.
- If liquid from the damaged battery comes in contact with clothing or skin, rinse immediately with plenty of water.

Observe the following precautions when handling the Charging AC Adapter

- Keep dry. Failure to observe this precaution could result in fire or electric shock.
- Dust on or near the metal parts of the plug should be removed with a dry cloth. Continued use could result in fire.
- Do not handle the plug or go near the Charging AC Adapter during lightning storms. Failure to observe this precaution could result in electric shock.
• Do not damage, modify, forcibly tug or bend the USB cable, place it under heavy objects, or expose it to heat or flames. Should the insulation be damaged and the wires become exposed, take it to a Nikon-authorized service representative for inspection. Failure to observe these precautions could result in fire or electric shock.
• Do not handle the plug or Charging AC Adapter with wet hands. Failure to observe this precaution could result in electric shock.
• Do not use with travel converters or adapters designed to convert from one voltage to another or with DC-to-AC inverters. Failure to observe this precaution could damage the product or cause overheating or fire.

⚠️ Use appropriate cables
When connecting cables to the input and output jacks, use only the cables provided or sold by Nikon for the purpose, to maintain compliance with product regulations.

⚠️ Handle moving parts with care
Be careful that your fingers or other objects are not pinched by the lens cover or other moving parts.

⚠️ CD-ROMs
The CD-ROMs included with this device should not be played back on audio CD equipment. Playing CD-ROMs on an audio CD player could cause hearing loss or damage the equipment.

⚠️ Using the flash close to your subject’s eyes could cause temporary visual impairment
The flash should be no less than 1 meter (3 ft 4 in.) from the subject. Particular care should be observed when photographing infants.

⚠️ Do not operate the flash with the flash window touching a person or object
Failure to observe this precaution could result in burns or fire.

⚠️ Avoid contact with liquid crystal
Should the monitor break, care should be taken to avoid injury caused by broken glass and to prevent liquid crystal from the monitor touching the skin or entering the eyes or mouth.

⚠️ Turn the power off when using inside an airplane or the hospital
Turn the power off while inside the airplane during take off or landing. Do not use wireless network functions while in the air. Follow the instructions of the hospital when using while in a hospital. The electromagnetic waves emitted by this camera may disrupt the electronic systems of the airplane or the instruments of the hospital. If you are using an Eye-Fi card, remove it from the camera before boarding an aircraft or entering a hospital.
Notices

Notices for Customers in the U.S.A.

IMPORTANT SAFETY INSTRUCTIONS–SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS

For connection to a supply not in the U.S.A., use an attachment plug adapter of the proper configuration for the power outlet if needed.

The power supply unit is intended to be correctly orientated in a vertical or floor mount position.

Federal Communications Commission (FCC) Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/television technician for help.

CAUTIONS

Modifications

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by Nikon Corporation may void the user’s authority to operate the equipment.

Interface Cables

Use the interface cables sold or provided by Nikon for your equipment. Using other interface cables may exceed the limits of Class B Part 15 of the FCC rules.
Notice for Customers in the State of California

WARNING
Handling the cord on this product will expose you to lead, a chemical known to the State of California to cause birth defects or other reproductive harm.

Wash hands after handling.

CAUTIONS
RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE.
DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS.
This symbol indicates that electrical and electronic equipment is to be collected separately.
The following apply only to users in European countries:
• This product is designated for separate collection at an appropriate collection point. Do not dispose of as household waste.
• Separate collection and recycling helps conserve natural resources and prevent negative consequences for human health and the environment that might result from incorrect disposal.
• For more information, contact the retailer or the local authorities in charge of waste management.

This symbol on the battery indicates that the battery is to be collected separately. The following apply only to users in European countries:
• All batteries, whether marked with this symbol or not, are designated for separate collection at an appropriate collection point. Do not dispose of as household waste.
• For more information, contact the retailer or the local authorities in charge of waste management.

Using Menus (the **MENU** Button)

Use the multi selector and the **OK** button to navigate the menus.

1. **Press the **MENU** button.**  
   - The menu is displayed.

2. **Press the multi selector ←.**  
   - The current menu icon is displayed in yellow.

3. **Select the desired menu icon.**  
   - The menu is changed.

4. **Press the **OK** button.**  
   - The menu options become selectable.
5  Select a menu option.

6  Press the OK button.

   • The settings for the option you selected are displayed.

7  Select a setting.

8  Press the OK button.

   • The setting you selected is applied.
   • When you are finished using the menu, press the MENU button.

![Menu Options Diagram]

**Setting Menu Options**

- Certain menu options cannot be set depending on the current shooting mode or the state of the camera. Unavailable options are displayed in gray and cannot be selected.

- When a menu is displayed, you can switch to shooting mode by pressing the shutter-release button, (shooting mode) button, or (movie-record) button.
The Monitor

The information that is displayed in the monitor during shooting and playback changes depending on the camera’s settings and state of use. By default, information is displayed when the camera is turned on and when you operate the camera, and turns off after a few seconds (when Photo info is set to Auto info in Monitor settings (73)).

The Basics of Shooting and Playback

Preparation 1 Insert the Battery

1. Open the battery-chamber/memory card slot cover.

2. Insert the battery.
   - Push the orange battery latch in the direction indicated by the arrow (①), and fully insert the battery (②).
   - The battery locks into place when inserted correctly.

Be Careful to Insert the Battery in Correct Direction

*Inserting the battery upside down or backwards could damage the camera.*
3 Close the battery-chamber/memory card slot cover.

Removing the Battery

Turn the camera off and make sure that the power-on lamp and monitor have turned off, and then open the battery-chamber/memory card slot cover. Move the battery latch in the direction indicated by the arrow (1) to eject the battery (2).

High Temperature Caution

The camera, battery, and memory card may be hot immediately after using the camera.
Prepare the included Charging AC Adapter.

- If a plug adapter* is included with your camera, attach the plug adapter to the plug on the Charging AC Adapter. Push the plug adapter firmly until it is securely held in place. Once the two are connected, attempting to forcibly remove the plug adapter could damage the product.
  * The shape of the plug adapter varies according to the country or region in which the camera was purchased. This step can be omitted if the plug adapter comes permanently bonded to the Charging AC Adapter.

Make sure the battery is installed in the camera, and then connect the camera to the Charging AC Adapter in order of ① to ③.

- Keep the camera turned off.
- Make sure that the plugs are properly oriented. Do not insert or remove the plugs at an angle when connecting or disconnecting them.

The charge lamp slowly flashes green to indicate that the battery is charging.
- Shooting is not possible while the camera is connected to the Charging AC Adapter.
3 Disconnect the Charging AC Adapter from the electrical outlet and then disconnect the USB cable.

- **Charging Using a Computer or Battery Charger**
  - You can also charge the battery by connecting the camera to a computer (74, 71).
  - You can use the Battery Charger MH-66 (available separately; 80) to charge the battery without using the camera.

<table>
<thead>
<tr>
<th>Charge lamp</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Flashes slowly (green)</td>
<td>The battery is charging.</td>
</tr>
<tr>
<td>Off</td>
<td>When charging is complete, the charge lamp stops flashing green and turns off. About 2 hours and 50 minutes are required to charge a fully exhausted battery.</td>
</tr>
</tbody>
</table>
| Flashes quickly (green) | • The ambient temperature is not suited to charging. Charge the battery indoors with an ambient temperature of 5°C to 35°C (41°F to 95°F).  
  • The USB cable or Charging AC Adapter is not properly connected, or there is a problem with the battery. Disconnect the USB cable or unplug the Charging AC Adapter and correctly connect it again, or change the battery. |
Preparation 3 Insert a Memory Card

1 Turn off the camera and open the battery-chamber/memory card slot cover.

2 Insert the memory card.
   • Slide the memory card in until it clicks into place.

Be Careful to Insert the Memory Card in Correct Direction

*Inserting the memory card upside down or backwards could damage the camera and memory card.*

3 Close the battery-chamber/memory card slot cover.
Formatting a Memory Card

The first time you insert a memory card that has been used in another device into this camera, make sure to format it with this camera. Insert the memory card into the camera, press the MENU button, and select Format card in the setup menu.

Removing the Memory Card

Turn the camera off and make sure that the power-on lamp and monitor have turned off, and then open the battery-chamber/memory card slot cover. Gently push the memory card into the camera (①) to partially eject the card (②).

High Temperature Caution

The camera, battery, and memory card may be hot immediately after using the camera.

Internal Memory and Memory Cards

Camera data, including images and movies, can be saved either in the camera’s internal memory or on a memory card. To use the camera’s internal memory, first remove the memory card.
Preparation 4 Setting the Display Language, Date, and Time

When the camera is turned on for the first time, the language-selection screen and the date and time setting screen for the camera clock are displayed.
- If you exit without setting the date and time, 🕒 will flash when the shooting screen is displayed.

1. Press the power switch to turn on the camera.

2. Use the multi selector ▲▼ to select the desired language and press the 🔄 button.

3. Select Yes and press the 🔄 button.
4 Select your home time zone and press the OK button.
- To enable daylight saving time, press ▲. When the daylight saving time function is enabled, ☀ is displayed above the map. To disable the daylight saving time function, press ▼.

5 Select the date format and press the OK button.

6 Set the date and time, and press the OK button.
- Select a field: Press ◀► (changes between D, M, Y, hour, and minute).
- Edit the date and time: Press ▲▼.
- Confirm the settings: Select the minute field and press the OK button.

7 Select Yes and press the OK button.
- When settings are finished, the lens extends and the camera switches to shooting mode.
Changing the Language or the Date and Time Setting

- You can change these settings using the **Language** and **Time zone and date** settings in the setup menu (73).
- You can enable or disable daylight saving time in the setup menu by selecting **Time zone and date** followed by **Time zone**. Press the multi selector △ and then ▲ to enable daylight saving time and move the clock forward one hour, or ▼ to disable daylight saving time and move the clock back one hour.

The Clock Battery

- The camera’s clock is powered by a built-in backup battery. The backup battery charges when the main battery is inserted into the camera or when the camera is connected to an optional AC adapter, and it can run the clock for several days after about ten hours of charging.
- If the camera’s backup battery becomes exhausted, the date and time setting screen is displayed when the camera is turned on. Set the date and time again. See step 3 (16) of “Preparation 4 Setting the Display Language, Date, and Time” for more information.

Imprinting the Shooting Date on Printed Images

- You can permanently imprint the shooting date on images as they are captured by setting **Print date** in the setup menu (73).
- You can use the ViewNX 2 software (77) to print the shooting date on images that were captured without using the **Print date** option.
Step 1 Turn the Camera On

1 Press the power switch.
   • The monitor turns on.
   • To turn the camera off, press the power switch again.

2 Check the battery level indicator and the number of exposures remaining.

Battery Level Indicator

<table>
<thead>
<tr>
<th>Display</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ ][ ]</td>
<td>The battery level is high.</td>
</tr>
<tr>
<td>[ ]</td>
<td>The battery level is low.</td>
</tr>
<tr>
<td>!</td>
<td>The camera cannot capture images.</td>
</tr>
<tr>
<td>Battery exhausted.</td>
<td>Recharge the battery.</td>
</tr>
</tbody>
</table>

Number of Exposures Remaining
The number of images that can be taken is displayed.
• IN is displayed when no memory card is inserted in the camera, and images are saved in the internal memory.
The Basics of Shooting and Playback

The Auto Off Function

- The time that elapses before the camera enters standby mode is about one minute. The time can be changed using the **Auto off** setting in the setup menu (73).

- While the camera is in standby mode, the monitor turns back on if you perform any of the following operations:
  - Press the power switch, shutter-release button, [shooting mode] button, [playback] button, or [movie-record] button.
Step 2 Select a Shooting Mode

1. Press the button.

2. Use the multi selector ▲▼ to select a shooting mode and press the OK button.
   - (scene auto selector) mode is used in this example.
   - The shooting mode setting is saved even after the camera is turned off.
## Available Shooting Modes

<table>
<thead>
<tr>
<th>Mode</th>

<td>Camera settings are optimized according to the scene that you select.</td>
<td>33</td>
</tr>
<tr>
<td>Special effects</td>
<td>Effects can be applied to images during shooting.</td>
<td>38</td>
</tr>
<tr>
<td>Smart portrait</td>
<td>When the camera detects a smiling face, you can take an image automatically without pressing the shutter-release button (smile timer). You can also use the skin softening option to smooth the skin tones of human faces.</td>
<td>40</td>
</tr>
<tr>
<td>Auto mode</td>
<td>Used for general shooting. Settings can be adjusted to suit the shooting conditions and the type of shot you want to capture.</td>
<td>42</td>
</tr>
</tbody>
</table>
Step 3 Frame a Picture

1  Hold the camera steady.
   • Keep fingers and other objects away from the lens, flash, AF assist-illuminator, microphone, and speaker.
   • When taking pictures in portrait (“tall”) orientation, turn the camera so that the flash is above the lens.

2  Frame the picture.
   • When the camera automatically determines the scene mode, the shooting mode icon changes (page 32).

Notes About (Scene Auto Selector) Mode
   • Depending upon shooting conditions, the camera may not select the desired scene mode. In this case, select another shooting mode (page 33, 38, 40, 42).
   • When the digital zoom is in effect, the scene mode changes to .
When Using a Tripod

- We recommend using a tripod to stabilize the camera in the following situations:
  - When shooting in dim lighting
  - When shooting with the flash mode (46) set to  (off)
  - When using the telephoto setting

- When using a tripod to stabilize the camera during shooting, set Photo VR to Off in the setup menu (73) to prevent potential errors caused by this function.

Using the Zoom

When you move the zoom control, the zoom lens position changes.

- To zoom in closer to the subject: Move toward T (telephoto).
- To zoom out and view a larger area: Move toward W (wide-angle).

When you turn the camera on, the zoom moves to the maximum wide-angle position.

- A zoom indicator is displayed at the top of the monitor when the zoom control is moved.
- Digital zoom, which allows you to further magnify the subject up to approximately 4x the maximum optical zoom ratio, can be activated by moving and holding the zoom control toward T when the camera is zoomed in to the maximum optical zoom position.

Notes About Digital Zoom

The zoom indicator turns blue when the digital zoom is activated, and it turns yellow when the zoom magnification is increased further.

- Zoom indicator is blue: Image quality is not noticeably reduced by using the Dynamic Fine Zoom.
- Zoom indicator is yellow: Image quality is noticeably reduced.
- The indicator remains blue across a wider area when the image size is smaller.
- The zoom indicator may not turn blue when using certain continuous shooting settings.
1 Press the shutter-release button halfway.

- When the subject is in focus, the focus area glows green (multiple focus areas can glow green).
- When you are using digital zoom, the camera focuses in the center of the frame and the focus area is not displayed. When the camera has focused, the focus indicator (A) glows green.
- If the focus area or focus indicator flashes, the camera is unable to focus. Modify the composition and try pressing the shutter-release button halfway again.

2 Without lifting your finger, press the shutter-release button the rest of the way down.
# The Shutter-release Button

| Press halfway | To set focus and exposure (shutter speed and aperture value), press the shutter-release button lightly until you feel a slight resistance. Focus and exposure remain locked while the shutter-release button is pressed halfway. |
| Press all the way | Press the shutter-release button all the way to release the shutter and take an image. Do not use force when pressing the shutter-release button, as this may result in camera shake and blurred images. Press the button gently. |

## Notes About Saving Images and Recording Movies

The indicator showing the number of exposures remaining or the indicator showing the maximum movie length flashes while images are being saved or while a movie is being recorded. **Do not open the battery-chamber/memory card slot cover or remove the battery or memory card** while an indicator is flashing. Doing this could result in loss of data, or in damage to the camera or the memory card.
Step 5 Play Back Images

1 Press the \( \text{[playback]} \) button.
   
   - If you press and hold down the \( \text{[playback]} \) button while the camera is turned off, the camera turns on in playback mode.

2 Use the multi selector to select an image to display.
   
   - Press and hold down \( \text{[\( \),\( \)]\( \),\( \)} \) to scroll through the images quickly.

   - To return to shooting mode, press the \( \text{[\( \),\( \)]} \) button or shutter-release button.
The Quick Effects Function

- When the Quick Effects icon is displayed in full-frame playback mode, you can press the OK button to apply an effect to the image.
- When the effect selection screen is displayed, use the multi selector ▲▼◄► to select an effect, press the OK button, and then select Yes in the confirmation dialog and press the OK button to save the image as a separate file.
See “Quick Effects: Changing Hue or Mood” (12) for more information.
Step 6 Delete Images

1. Press the trash button to delete the image currently displayed in the monitor.

2. Use the multi selector ▲▼ to select the desired deletion method and press the OK button.
   - To exit without deleting, press the MENU button.

3. Select Yes and press the OK button.
   - Deleted images cannot be recovered.
   - To cancel, select No and press the OK button.
Operating the Erase Selected Images Screen

1. Use the multi selector  to select an image to be deleted, and then use  to display .
   - To undo the selection, press  to remove  .
   - Move the zoom control ( 1 ) toward  to switch to full-frame playback or  to switch to thumbnail playback.

2. Add  to all images that you want to delete and then press the  button to confirm the selection.
   - A confirmation dialog is displayed. Follow the on-screen instructions to complete operations.

Deleting the Last Image Captured while in Shooting Mode

When using shooting mode, press the  button to delete the last image that was saved.
Shooting Features

(Scene Auto Selector) Mode

The camera automatically selects the optimum scene mode when you frame an image, making it even easier to take images using settings that suit the scene.

Enter shooting mode ➔ (shooting mode) button ➔ (scene auto selector) ➔ (OK) button

When the camera selects a scene mode, the shooting mode icon displayed in the shooting screen changes to that for the scene mode currently enabled.

¹ The camera focuses at infinity.
² The camera focuses on the area in the center of the frame.
³ Use of a tripod is recommended, because the shutter speed is slow. Set Photo VR to Off in the setup menu (73) when using a tripod to stabilize the camera during shooting.

Displaying a Description of Each Scene Mode (Help Display)

Select a scene and move the zoom control (1) toward T (?) to view a description of that scene. To return to the original screen, move the zoom control toward T (?) again.
**Tips and Notes**

**Sports**
- While the shutter-release button is held all the way down, the camera shoots up to about 6 images continuously at a rate of about 1.1 fps (when image mode is set to 20m).
- The frame rate for continuous shooting may vary depending on the current image mode setting, the memory card used, or shooting conditions.
- Focus, exposure, and hue are fixed at the values determined with the first image in each series.

**Party/indoor**
- To avoid the effects of camera shake, hold the camera steady. Set **Photo VR** to **Off** in the setup menu (73) when using a tripod to stabilize the camera during shooting.

**Night landscape**
- From the screen displayed after **Night landscape** is selected, select **Hand-held** or **Tripod**.
- **Hand-held** (default setting): Select this option to produce shots with reduced blurring and noise even when the camera is hand-held.
- **Tripod**: Select this option when using a tripod or other means to stabilize the camera when shooting.
  - Vibration reduction is disabled even when **Photo VR** (73) in the setup menu is set to **On**.
**Close-up**

- Macro mode (49) is enabled and the camera automatically zooms to the closest position at which it can focus.
- You can move the focus area. Press the OK button, use the multi selector ▲▼◄► to move the focus area, and press the OK button to apply the setting.

**Food**

- Macro mode (49) is enabled and the camera automatically zooms to the closest position at which it can focus.
- You can adjust hue by using the multi selector ▲▼. The hue setting is saved in the camera’s memory even after the camera is turned off.
- You can move the focus area. Press the OK button, use the multi selector ▲▼◄► to move the focus area, and press the OK button to apply the setting.

**Museum**

- The camera captures a series of up to ten images while the shutter-release button is held all the way down, and the sharpest image in the series is automatically selected and saved (BSS (Best Shot Selector)).
- The flash does not fire.

**Fireworks show**

- The shutter speed is fixed at four seconds.
- The zoom is restricted to four fixed positions.

**Black and white copy**

- Use with macro mode (49) when shooting a subject at close distance.
Shooting Features

Backlighting

- The flash always fires.

Panorama assist

- You can use this mode when shooting a series of images that can later be joined on a computer to form a single panorama.
- Select the direction in which to add images to the panorama by using the multi selector ▲▼◄► and then press the OK button.
- After taking the first image, take the additional shots needed while checking how each image will connect to the next. To finish shooting, press the OK button.
- Transfer the images to a computer and use Panorama Maker (79) to join them into a single panorama.
See “Using Panorama Assist” (2) for more information.
Pet portrait

• When you point the camera at a dog or cat, the camera detects the pet’s face and focuses on it. By default, the camera detects a dog or cat face and automatically releases the shutter (pet portrait auto release).

• On the screen displayed when Pet portrait is selected, select [S] Single or [Q] Continuous.
  - [S] Single: The camera captures one image when a dog or cat face is detected.
  - [Q] Continuous: The camera captures three images continuously when a dog or cat face is detected.

Pet Portrait Auto Release

• Press the multi selector (0) to change the Pet portrait auto release setting.
  - [O]: The camera detects a dog or cat face and automatically releases the shutter.
  - OFF: The camera does not release the shutter automatically, even if a dog or cat face is detected.
    Press the shutter-release button. The camera also detects human faces when OFF is selected.

• Pet portrait auto release is set to OFF after five bursts have been taken.

• Shooting is also possible by pressing the shutter-release button, regardless of the Pet portrait auto release setting. When [Q] Continuous is selected, you can take images continuously while holding down the shutter-release button all the way.

Focus Area

• When the camera detects a face, the face is displayed inside a yellow border. When the camera acquires focus on a face displayed inside a double border (focus area), the double border turns green. If no faces are detected, the camera focuses on the subject in the center of the frame.

• Under some shooting conditions, the pet face may not be detected and other subjects may be displayed inside a border.
Special Effects Mode (Applying Effects When Shooting)

Effects can be applied to images during shooting.

Enter shooting mode ➔ (shooting mode) button ➔ S0 (third icon from the top*) ➔ ➔ ➔ select an effect ➔ OK button

* The icon of the last effect selected is displayed.

<table>
<thead>

</table>
Smart Portrait Mode (Capturing Images of Smiling Faces)

When the camera detects a smiling face, you can take an image automatically without pressing the shutter-release button (smile timer (55)). You can use the skin softening option to smooth the skin tones of human faces.

Enter shooting mode ➔ (shooting mode) button ➔ Smart portrait ➔ button

1. Frame the picture.
   - Point the camera at a human face.

2. Without pressing the shutter-release button, wait for the subject to smile.
   - If the camera detects that the face framed by the double border is smiling, the shutter is automatically released.
   - Whenever the camera detects a smiling face, it automatically releases the shutter.

3. End automatic shooting.
   - Perform one of the operations listed below to end shooting.
     - Set Smile timer to Off.
     - Press the button and select a different shooting mode.

Notes About Smart Portrait Mode

Under some shooting conditions, the camera may be unable to detect faces or smiles (58). The shutter-release button can also be used for shooting.
When the Self-timer Lamp Flashes

When using smile timer, the self-timer lamp flashes when the camera detects a face and flashes quickly immediately after the shutter is released.

Functions Available in Smart Portrait Mode

- Flash mode (45)
- Self-timer (47)
- Exposure compensation (50)
- Smart portrait menu (53)
(Auto) Mode

Used for general shooting. Settings can be adjusted to suit the shooting conditions and the type of shot you want to capture.

Enter shooting mode ➔ (shooting mode) button ➔ (auto) mode ➔ OK button

- You can change how the camera selects the area of the frame to focus on by changing AF area mode setting (A54). The default setting is Target finding AF (A60).

Functions Available in (Auto) Mode

- Flash mode (A45)
- Self-timer (A47)
- Macro mode (A49)
- Exposure compensation (A50)
- Shooting menu (A54)
Using Quick Effects
When in 📸 (auto) mode, you can apply effects to images immediately after releasing the shutter.
- The edited image is saved as a separate file with a different name.

1 Press the OK button when the image is displayed after it is taken in 📸 (auto) mode.
   - When you press the MENU button or when no operations are performed for about five seconds, the monitor display returns to the shooting screen.
   - To not display the screen shown on the right, set Quick effects to Off in the shooting menu (📸 54).

2 Use the multi selector ▲▼◄► to select the desired effect and press the OK button.
   - Move the zoom control (📸 1) toward T (📸) to switch to full-frame playback or W (📸) to switch to thumbnail playback.
   - To exit without saving the edited image, press the MENU button. When a confirmation dialog is displayed, select Yes and press the OK button.
   - See “Quick Effects: Changing Hue or Mood” (📸 12) for information about the effect types.

3 Select Yes and press the OK button.
Functions That Can Be Set Using the Multi Selector

The functions that are available vary depending on the shooting mode, as shown below.

<table>
<thead>

</tbody>
</table>

* Availability depends on the setting.
Using the Flash
You can select a flash mode to match the shooting conditions.

1. Press the multi selector ▲ (şık).

2. Select the desired flash mode (46) and press the OK button.
   • If a setting is not applied by pressing the OK button within a few seconds, the selection will be canceled.

The Flash Lamp
• The status of the flash can be confirmed by pressing the shutter-release button halfway.
  - On: The flash fires when you press the shutter-release button all the way down.
  - Flashing: The flash is charging. The camera cannot shoot images.
  - Off: The flash does not fire when an image is taken.
• If the battery level is low, the monitor turns off while the flash is charging.
### Available Flash Modes

<table>
<thead>
<tr>
<th>Flash Mode</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Auto** | The flash fires when necessary, such as in dim lighting.  
- The flash mode icon on the shooting screen is displayed only immediately after the setting is made. |
| **Auto with red-eye reduction** | Reduce “red-eye” in portraits caused by the flash. |
| **Off** | The flash does not fire.  
- We recommend using a tripod to stabilize the camera when shooting in dark surroundings. |
| **Fill flash** | The flash fires whenever an image is taken. Use to “fill-in” (illuminate) shadows and backlit subjects. |
| **Slow sync** | Suited to evening and night portraits that include background scenery. The flash fires when necessary to illuminate the main subject; slow shutter speeds are used to capture background at night or under dim lighting. |

### The Flash Mode Setting
- The setting may not be available with some shooting modes.
- The setting applied in **Auto** (auto) mode is saved in the camera’s memory even after the camera is turned off.

### Red-eye Reduction
If the camera detects red eye while saving an image, the affected area is processed to reduce red-eye before the image is saved.

Note the following when shooting:
- More time than usual is required to save images.
- Red-eye reduction may not produce the desired results in some situations.
- In some rare cases, red-eye reduction may be applied unnecessarily to other areas of the image. In these cases, select another flash mode and take the image again.
Using the Self-timer

The camera is equipped with a self-timer that releases the shutter about ten seconds or two seconds after you press the shutter-release button. Set **Photo VR** to **Off** in the setup menu (73) when using a tripod to stabilize the camera during shooting.

1. Press the multi selector \(\leftarrow\) (\(\infty\)).

2. Select \(\leftarrow 10\)s or \(\leftarrow 2\)s, and press the OK button.
   - \(\leftarrow 10\)s (ten seconds): Use on important occasions, such as weddings.
   - \(\leftarrow 2\)s (two seconds): Use to prevent camera shake.
   - If a setting is not applied by pressing the OK button within a few seconds, the selection will be canceled.
   - When the shooting mode is **Pet portrait** scene mode, \(\infty\) (pet portrait auto release) is displayed (37). The self-timer cannot be used.

3. Frame the picture and press the shutter-release button halfway.
   - Focus and exposure are set.
4 Press the shutter-release button the rest of the way down.

- Countdown starts. The self-timer lamp flashes and then glows steadily about one second before the shutter is released.
- When the shutter is released, the self-timer is set to OFF.
- To stop the countdown, press the shutter-release button again.
Using Macro Mode
Use macro mode when taking close-up images.

1 Press the multi selector ▼ (macro).

2 Select **ON** and press the **OK** button.
   - If the setting is not applied by pressing the **OK** button within a few seconds, the selection will be canceled.

3 Move the zoom control to set the zoom ratio to a position where ♻ and the zoom indicator glow green.
   - When the zoom ratio is set to a position where the zoom indicator glows green, the camera can focus on subjects as close as approximately 9 cm (3.6 in.) from the lens. When the zoom is at the position where ♻ is displayed, the camera can focus on subjects as close as approximately 2 cm (0.8 in.) from the lens.

**Notes About Using the Flash**
The flash may be unable to light the entire subject at distances of less than 50 cm (1 ft 8 in.).

**The Macro Mode Setting**
- The setting may not be available with some shooting modes.
- The setting applied in ✂ (auto) mode is saved in the camera’s memory even after the camera is turned off.
Adjusting Brightness (Exposure Compensation)

You can adjust overall image brightness.

1. Press the multi selector ➤ ( ).

2. Select a compensation value and press the OK button.
   - To brighten the image, set a positive (+) value.
   - To darken the image, set a negative (–) value.
   - The compensation value is applied, even without pressing the OK button.

Exposure Compensation Value

The setting applied in (auto) mode is saved in the camera’s memory even after the camera is turned off.
Default Settings

Default settings for each shooting mode are described below.

1 $^5$ AUTO (auto flash) or $^5$ (off) can be selected. When $^5$ AUTO (auto flash) is selected, the camera automatically selects the flash mode appropriate for the scene it has been selected.

2 The setting cannot be changed.

3 The setting cannot be changed. The flash mode setting is fixed at the fill flash with slow sync and red-eye reduction.

4 Slow sync with red-eye reduction flash mode may be used.

5 Self-timer cannot be used. Pet portrait auto release can be turned on or off (37).
The settings listed below can be changed by pressing the **MENU** button during shooting (4).

The settings that can be changed vary depending on the shooting mode, as shown below.

### Notes About Digital Zoom

- Depending on the shooting mode or the current settings, digital zoom may not be available (67).
- When digital zoom is in effect, the camera focuses in the center of the frame.
The focus area varies depending on the shooting mode.

**Using Face Detection**

When the camera is pointed at a human face in the shooting modes as shown below, the camera automatically detects the face and focuses on it.

- **Portrait, Night portrait**, or **Backlighting** in **scene auto selector** mode (32)
- **Portrait** or **Night portrait** in scene mode (33)
- Smart portrait mode (40)
- When **AF area mode** (54) is set to **Face priority** in **auto** mode (42)

When the camera detects more than one face, the double border (focus area) is displayed around the face that is focused on, and single borders around the others.

If the shutter button is pressed halfway when no faces are detected:

- When **scene auto selector** mode is selected, the focus area changes depending on the scene.
- In **Portrait** and **Night portrait** scene modes or in smart portrait mode, the camera focuses in the center of the frame.
- In **auto** mode, the camera selects the focus area containing the subject closest to the camera.

**Notes About Face Detection**

- The camera’s ability to detect faces depends on a variety of factors, including the direction in which the faces are looking.
- The camera may be unable to detect faces in the following situations:
  - When faces are partially hidden by sunglasses or otherwise obstructed
  - When faces take up too much or too little of the frame
Using Skin Softening

When the shutter is released while using one of the shooting modes listed below, the camera detects human faces and processes the image to soften facial skin tones (up to three faces).

- Smart portrait mode (40)
  - The skin softening level can be adjusted.
- Portrait, Night portrait, or Backlighting in (scene auto selector) mode (32)
- Portrait or Night portrait in scene mode (33)

Editing functions such as Skin softening can be applied to saved images by using Glamour retouch (65) even after shooting.

Notes About Skin Softening

- It may take more time than usual to save images after shooting.
- Under some shooting conditions, the desired skin softening results may not be achieved, and skin softening may be applied to areas of the image where there are no faces.
Using Target Finding AF

When AF area mode (54) in (auto) mode is set to Target finding AF, the camera focuses in the manner described below when you press the shutter-release button halfway.

- The camera detects the main subject and focuses on it. When the subject is in focus, the focus area glows green. If a human face is detected, the camera automatically sets focus priority on it.

- If no main subject is detected, the camera automatically selects one or more of the nine focus areas containing the subject closest to the camera. When the subject is in focus, the focus areas that are in focus glow green.

Notes About Target Finding AF

- Depending on shooting conditions, the subject that the camera determines to be the main subject may vary.
- The main subject may not be detected when using certain White balance settings.
- The camera may not detect the main subject appropriately in the following situations:
  - When the subject is very dark or bright
  - When the main subject lacks clearly defined colors
  - When the shot is framed so that the main subject is at the edge of the monitor
  - When the main subject is composed of a repeating pattern
Subjects Not Suitable for Autofocus

The camera may not focus as expected in the following situations. In some rare cases, the subject may not be in focus despite the fact that the focus area or the focus indicator glows green:

- Subject is very dark
- Objects of sharply differing brightness are included in the scene (e.g. the sun behind the subject makes that subject appear very dark)
- No contrast between the subject and surroundings (e.g. a portrait subject wearing a white shirt is standing in front of a white wall)
- Several objects are at different distances from the camera (e.g. the subject is inside a cage)
- Subjects with repeating patterns (window blinds, buildings with multiple rows of similarly shaped windows, etc.)
- Subject is moving rapidly

In the situations noted above, try pressing the shutter-release button halfway to refocus several times, or focus on another subject positioned at the same distance from the camera as the actual desired subject, and use focus lock (62).
Focus Lock
Focus lock shooting is recommended when the camera does not activate the focus area that contains the desired subject.

1. Set **AF area mode** to **Center** in **(auto)** mode (54).

2. Position the subject in the center of the frame and press the shutter-release button halfway.
   - The camera focuses on the subject and the focus area glows green.
   - Focus and exposure are locked.

3. Without lifting your finger, recompose the picture.
   - Make sure to maintain the same distance between the camera and the subject.

4. Press the shutter-release button the rest of the way down to take the picture.
Playback Features

Playback Zoom

Moving the zoom control toward T (🔍) in full-frame playback mode (28) zooms in on the image.

- You can change the zoom ratio by moving the zoom control toward W ( לקוחות ) or T (🔍).
- To view a different area of the image, press the multi selector ◀️▶️putc.  
- If you are viewing an image that was captured using face detection or pet detection, the camera zooms in on the face detected at the time of shooting, except for images captured with Continuous, BSS, Multi-shot 16, or Subject tracking. To zoom in on an area of the image where there are no faces, change the zoom ratio and then, press ◀️▶️putc.
- When a zoomed image is displayed, press the OK button to return to full-frame playback mode.

💡 Cropping Images

When a zoomed image is displayed, you can press the MENU button to crop the image to include only the visible portion and save it as a separate file (18).
Moving the zoom control toward \textbf{W} (\( \mathbb{W} \)) in full-frame playback mode (28) displays images as thumbnails.

- You can change the number of thumbnails displayed by moving the zoom control toward \textbf{W} (\( \mathbb{W} \)) or \textbf{T} (\( \mathbb{Q} \)).
- While using thumbnail playback mode, press the multi selector \( \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet} \) to select an image and then press the \( \text{OK} \) button to display that image in full-frame playback mode.
- While using calendar display mode, press \( \text{\textbullet} \text{\textbullet} \text{\textbullet} \text{\textbullet} \) to select a date and then press the \( \text{OK} \) button to display the image captured on that day.

\textbf{Notes About Calendar Display}

Images captured when the camera’s date is not set are treated as images captured on January 1, 2014.
## Functions That Can Be Set with the **MENU** Button
(Playback Menu)

When viewing images in full-frame playback mode or thumbnail playback mode, you can configure the menu operations listed below by pressing the **MENU** button (14).

* Edited images are saved as separate files. Some images may not be edited.*
Recording and Playing Back Movies

Recording Movies

1. Display the shooting screen.
   - Check the remaining amount of movie recording time.
   - When the **Photo info** option in **Monitor settings** (page 73) in the setup menu is set to **Movie frame+auto info**, the area that will be visible in the movie can be confirmed before movie recording starts.

2. Press the **movie-record** button to start movie recording.
   - The camera focuses in the center of the frame.

3. Press the **movie-record** button again to end recording.
**Maximum Movie Length**

Individual movie files cannot exceed 2 GB in size or 29 minutes in length, even when there is sufficient free space on the memory card for longer recording.

- The maximum movie length for a single movie is displayed on the shooting screen.
- Recording may end before either limit is reached if camera temperature becomes elevated.
- The actual movie length may vary depending on the movie content, subject movement, or type of memory card.

**Notes About Saving Images and Recording Movies**

The indicator showing the number of exposures remaining or the indicator showing the maximum movie length flashes while images are being saved or while a movie is being recorded. **Do not open the battery-chamber/memory card slot cover or remove the battery or memory card** while an indicator is flashing. Doing this could result in loss of data, or in damage to the camera or the memory card.

**Notes About Movie Recording**

- Memory cards with an SD Speed Class rating of 6 or faster are recommended when recording movies (20). Movie recording may stop unexpectedly when memory cards with a lower Speed Class ratings are used.
- There may be some degradation in image quality when digital zoom is used.
- The sounds of zoom control operation, zoom, autofocus lens drive movement, movie vibration reduction, and aperture operation when brightness changes may be recorded.
- Smear (3) visible in the monitor with movie recording will be recorded with movies. Avoiding bright objects such as the sun, reflections of the sun, and electric lights when recording movies is recommended.
- Depending on the distance to the subject or the amount of zoom applied, subjects with repeating patterns (fabrics, lattice windows, etc.) may have colored stripes (interference patterns, moire, etc.) in them during movie recording and playback. This occurs when the pattern in the subject and the layout of the image sensor interfere with each other; it is not a malfunction.
✓ Notes About Vibration Reduction During Movie Recording

• When Movie VR in the movie menu (Fig. 70) is set to On (hybrid), the angle of view (i.e., the area visible in the frame) becomes narrower during movie recording.
• When using a tripod to stabilize the camera during shooting, set Movie VR to Off to prevent potential errors caused by this function.

✓ Notes About Camera Temperature

• The camera may become hot when shooting movies for an extended period of time or when the camera is used in a hot area.
• If the inside of the camera becomes extremely hot when recording movies, the camera will automatically stop recording.
  The amount of time remaining until the camera stops recording (Fig. 10s) is displayed.
  After the camera stops recording, it turns itself off.
  Leave the camera off until the inside of the camera has cooled.

✓ Notes About Autofocus for Movie Recording

Autofocus may not perform as expected (Fig. 61). Should this occur, try the following:

1. Set Autofocus mode in the movie menu to Single AF (default setting) before starting movie recording.
2. Frame another subject (positioned at the same distance from the camera as the intended subject) in the center of the frame, press the ● (Fig. movie-record) button to start recording, and modify the composition.
## Functions That Can Be Set with the **MENU** Button (Movie Menu)

Enter shooting mode ➔ **MENU** button ➔  menu icon ➔  **OK** button

The settings of the menu options listed below can be configured.

Connecting the Camera to a TV, Computer, or Printer

Connection Methods

You can enhance your enjoyment of images and movies by connecting the camera to a TV, computer, or printer.

- Before connecting the camera to an external device, make sure the remaining battery level is sufficient and turn the camera off. Before disconnecting, make sure to turn the camera off.
- If the AC Adapter EH-62G (available separately) is used, this camera can be powered from an electrical outlet. Do not use any other make or model of AC adapter as it may cause the camera to heat up or malfunction.
- For information about the connection methods and subsequent operations, refer to the documentation included with the device in addition to this document.
Connecting the Camera to a TV, Computer, or Printer

**Viewing images on a TV**

Images and movies captured with the camera can be viewed on a TV. Connection method: Connect the video and audio plugs of an optional audio video cable to the TV’s input jacks.

**Viewing and organizing images on a computer**

You can transfer images to a computer to perform simple retouching and manage image data. Connection method: Connect the camera to the computer’s USB port with the USB cable.

- Before connecting to a computer, install ViewNX 2 on the computer (77).
- If any USB devices that draw the power from the computer are connected, disconnect them from the computer before you connect the camera to it. Connecting the camera and other USB-powered devices to the same computer simultaneously may cause a camera malfunction or excessive power supply from the computer, which could damage the camera or memory card.

**Printing images without using a computer**

If you connect the camera to a PictBridge-compatible printer, you can print images without using a computer. Connection method: Connect the camera directly to the printer’s USB port with the USB cable.
Using ViewNX 2

ViewNX 2 is an all-in-one software package which enables you to transfer, view, edit and share images. Install ViewNX 2 using the included ViewNX 2 CD-ROM.

Installing ViewNX 2

- An Internet connection is required.

Compatible Operating Systems

Windows
Windows 8.1, Windows 7, Windows Vista, Windows XP

Mac
OS X 10.9, 10.8, 10.7

Refer to the Nikon website for details on system requirements, including the latest information on operating system compatibility.
1  Start the computer and insert the ViewNX 2 CD-ROM into the CD-ROM drive.
   • Windows: If instructions for operating the CD-ROM are displayed in the window, follow the instructions to proceed to the installation window.
   • Mac: When the ViewNX 2 window is displayed, double-click the Welcome icon.

2  Select a language in the language selection dialog to open the installation window.
   • If the desired language is not available, click Region Selection to choose a different region, and then choose the desired language (the Region Selection button is not available in the European release).
   • Click Next to display the installation window.

3  Start the installer.
   • We recommend clicking Installation Guide in the installation window to check the installation help information and system requirements before installing ViewNX 2.
   • Click Typical Installation (Recommended) in the installation window.

4  Download the software.
   • When the Software Download screen is displayed, click I agree - Begin download.
   • Follow the on-screen instructions to install the software.
5 Exit the installer when the installation completion screen is displayed.
   • Windows: Click **Yes**.
   • Mac: Click **OK**.

The following software is installed:
   • ViewNX 2 (consisting of the three modules below)
     - Nikon Transfer 2: For transferring images to the computer
     - ViewNX 2: For viewing, editing, and printing transferred images
     - Nikon Movie Editor: For basic editing of transferred movies
   • Panorama Maker (for creating a single panorama photo using a series of images shot in panorama assist scene mode)

6 Remove the ViewNX 2 CD-ROM from the CD-ROM drive.
1 Choose how images will be copied to the computer.

Choose one of the following methods:

- **Direct USB connection**: Turn the camera off and ensure that the memory card is inserted in the camera. Connect the camera to the computer using the USB cable. The camera automatically turns on.
  To transfer images that are saved in the camera’s internal memory, remove the memory card from the camera before connecting it to the computer.

- **SD card slot**: If your computer is equipped with an SD card slot, the card can be inserted directly in the slot.

- **SD card reader**: Connect a card reader (available separately from third-party suppliers) to the computer and insert the memory card.
If a message is displayed prompting you to choose a program, select Nikon Transfer 2.

- **When using Windows 7**
  If the dialog shown at right is displayed, follow the steps below to select Nikon Transfer 2.
  
  1. Under **Import pictures and videos**, click **Change program**. A program selection dialog will be displayed; select **Import File using Nikon Transfer 2** and click **OK**.
  2. Double-click **Import File**.

If the memory card contains a large number of images, it may take a while for Nikon Transfer 2 to start. Wait until Nikon Transfer 2 starts.

**Connecting the USB Cable**

The connection may not be recognized if the camera is connected to the computer via a USB hub.

2. Transfer images to the computer.
   - Click **Start Transfer**.
     - At default settings, all the images on the memory card will be copied to the computer.
3 Terminate the connection.

- If the camera is connected to the computer, turn the camera off and disconnect the USB cable. If you are using a card reader or card slot, choose the appropriate option in the computer operating system to eject the removable disk corresponding to the memory card, and then remove the card from the card reader or card slot.

**Viewing Images**

**Start ViewNX 2.**

- Images are displayed in ViewNX 2 when transfer is complete.
- Consult online help for more information on using ViewNX 2.

**Starting ViewNX 2 Manually**

- **Windows:** Double-click the ViewNX 2 shortcut on the desktop.
- **Mac:** Click the ViewNX 2 icon in the Dock.
Reference Section

The Reference Section provides detailed information and hints for using the camera.

Using Panorama Assist

Use a tripod for the best results. Set Photo VR to Off in the setup menu (73) when using a tripod to stabilize the camera during shooting.

Enter shooting mode → (shooting mode) button → (second icon from the top*) → ▲▼ → (Panorama assist) → OK button

* The icon for the last scene mode selected is displayed.

1 Use the multi selector ▲▼► to select the direction in which images are joined, and press the OK button.
   • If necessary, apply flash mode (45), self-timer (47), macro mode (49) and exposure compensation (50) settings in this step.
   • Press the OK button to reselect the direction.

2 Frame the first portion of the panorama scene and take the first picture.
   • The camera focuses on the subject in the center of the frame.
   • About one third of the image is displayed as translucent.
3 Take the next picture.
   • Match the outline of the next image so that one third of the frame overlaps the previous image, and press the shutter-release button.

4 Press the OK button when shooting is complete.
   • The camera returns to step 1.

√ Notes About Panorama Assist
   • Shooting for the panorama series is terminated if the auto off function (68) initiates standby mode during shooting. Setting the time allowed to elapse before the auto off function is enabled to a longer setting is recommended.
   • Images cannot be deleted while shooting in panorama assist mode. When shooting a new image, return to step 1 and start over again.
**AE/AF-L Indicator**

In panorama assist scene mode, exposure, white balance, and focus for all images in a panorama are fixed at the values for the first image in each series. When the first image is taken, **AE/AF-L** is displayed to indicate that exposure, white balance, and focus are locked.

---

**Panorama Creation with Panorama Maker**

Transfer images to a computer (80) and use Panorama Maker to join them in a single panorama.

- Panorama Maker can be installed on a computer using the included ViewNX 2 CD (77).
- For more information on using Panorama Maker, refer to the on-screen instructions and help information contained in Panorama Maker.
Favorite Pictures Mode

By adding images (except movies) to albums as favorite pictures, you can play back only the added images.

- Images can be sorted into nine albums. Up to 200 images can be added to each album.
- The original images are not copied or moved.
- The same image can be added to multiple albums.

Adding Images to Albums

Press the button (playback mode) ➔ MENU button ➔ Favorite pictures ➔ OK button

1. Use the multi selector to select an image and use ▲ to display ⭐.
   - You can add ⭐ to multiple images. To remove ⭐, press ▼.
   - Move the zoom control (1) toward T (Q) to switch to full-frame playback or W (Q) to switch to thumbnail playback.

2. Press the OK button after configuring the settings.

3. Select the desired album and press the OK button.
   - The selected images are added.
Playing Back Images in Albums

Press the \( \Rightarrow \) button (playback mode) \( \Rightarrow \) \( \Rightarrow \) \( \Rightarrow \) Favorite pictures \( \Rightarrow \) OK button

Use the multi selector to select an album and then press the OK button to play back the images in the selected album.
- Functions in the playback menu (65) can be used for the images in the selected album (except Copy and Favorite pictures).
- The following operations are available from the album selection screen.
  - MENU button: Changes the album icon (8).
  - \( \Rightarrow \) button: Deletes all original images added to the selected album.

Notes About Deletion

If an image is deleted while using favorite pictures mode, the original image is deleted. When removing images from albums, see “Removing Images from Albums” (7).
Removing Images from Albums

Enter ★ Favorite pictures mode ➔ select the album containing the image you want to remove ➔ OK button ➔ MENU button ➔ Remove from favorites ➔ OK button

1. Use the multi selector ◀▶ to select an image and use ▲ to hide ★.
   - To display the icons again, press ▼.
   - Move the zoom control (↑) toward T (▲) to switch to full-frame playback or W (▼) to switch to thumbnail playback.

2. Press the OK button after configuring the settings.

3. Select Yes and press the OK button.
   - To cancel removal, select No.
Changing the Favorites Album Icon

Press the \[
\text{button (playback mode)} \rightarrow \text{button} \rightarrow \text{Favorite pictures} \rightarrow \text{button}
\]

1. Use the multi selector to select an album and press the \text{MENU} button.

2. Use \[\text{to select an icon color and press the} \text{button.}

3. Select an icon and press the \text{button.}
   - The icon changes.
Auto Sort Mode

Images are automatically sorted into categories, such as portraits, landscapes, and movies, based on the camera settings at the time of shooting.

Press the \( \square \) button (playback mode) \( \rightarrow \) \( \square \) button \( \rightarrow \) AUTO Auto sort \( \rightarrow \) OK button

Use the multi selector to select a category and then press the OK button to play back the images in the selected category.

- Functions in the playback menu (65) can be used for the images in the selected category (except Copy and Remove from favorites).
- While the category selection screen is displayed, press the \( \square \) button to delete all original images in the selected category.

Notes About Auto Sort Mode

- Up to 999 images and movie files can be sorted into each category in auto sort mode.
- Images or movies saved by cameras other than this camera cannot be played back in auto sort mode.
List by Date Mode

Press the \( \equiv \) button (playback mode) \( \rightarrow \equiv \) button \( \equiv \) List by date \( \rightarrow \equiv \) button

Use the multi selector to select a date and then press the \( \equiv \) button to play back the images captured on the selected date.

- Functions in the playback menu (65) can be used for the images in the selected shooting date (except Copy and Remove from favorites).
- The following operations are available while the shooting date selection screen is displayed.
  - \text{MENU} button: The functions listed below are available.
    - Print order*
    - Slide show
    - Protect*
  * The same settings can be applied to all images captured on the selected date.
  - \( \equiv \) button: Deletes all images captured on the selected date.

\textbf{Notes About List by Date Mode}

- Up to the most recent 29 dates can be selected. If images exist for more than 29 dates, all images saved earlier than the most recent 29 dates will be combined under Others.
- The 9,000 most recent images can be displayed.
- Images captured when the camera’s date is not set are treated as images captured on January 1, 2014.
Editing Images (Still Images)

Before Editing Images
You can easily edit images on this camera. Edited copies are saved as separate files. Edited copies are saved with the same shooting date and time as the original.

⚠️ Restrictions on Image Editing
An image can be edited up to ten times.
Quick Effects: Changing Hue or Mood

<table>
<thead>
<tr>
<th>Quick Effects Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pop and Super vivid</td>
<td>Mainly enhances the color saturation.</td>
</tr>
<tr>
<td>Painting, High key, Toy camera effect 1, Toy camera effect 2, Low key, Cross process (red), Cross process (yellow), Cross process (green), and Cross process (blue)</td>
<td>Mainly adjusts hue and creates a different look for the image.</td>
</tr>
<tr>
<td>Photo illustration, Soft, Soft portrait, Fisheye, Cross screen, and Miniature effect</td>
<td>Processes images with a variety of effects.</td>
</tr>
<tr>
<td>High-contrast monochrome, Sepia, Cyanotype, and Selective color</td>
<td>Turns multicolor images into single color images. Selective color transforms all colors, except a specified color, to black and white.</td>
</tr>
</tbody>
</table>

1. Display the image to which you want to apply an effect in full-frame playback mode and press the OK button.

2. Use the multi selector ▲▼◄► to select the desired effect and press the OK button.
   - Move the zoom control (1) toward T (Q) to switch to full-frame playback or W (E) to switch to thumbnail playback.
   - To exit without saving the edited image, press the MENU button.

3. Select Yes and press the OK button.
   - An edited copy is created.
Quick Retouch: Enhancing Contrast and Saturation

Press the button (playback mode) ➔ select an image ➔ menu button ➔ Quick retouch ➔ OK button

Use the multi selector ▲▼ to select the amount of effect applied and press the OK button.
- The edited version is displayed on the right.
- To exit without saving the copy, press .BACK.

D-Lighting: Enhancing Brightness and Contrast

Press the button (playback mode) ➔ select an image ➔ menu button ➔ D-Lighting ➔ OK button

Use the multi selector ▲▼ to select OK and press the OK button.
- The edited version is displayed on the right.
- To exit without saving the copy, select Cancel and press the OK button.
Red-eye Correction: Correcting Red-eye When Shooting with the Flash

Press the button (playback mode) ➔ select an image ➔ button ➔
Red-eye correction ➔ button

Preview the result and press the button.
• To exit without saving the copy, press the multi selector ◀.

Notes About Red-eye Correction
• Red-eye correction can only be applied to images when red-eye is detected.
• Red-eye correction can be applied to pets (dogs or cats) even if their eyes are not red.
• Red-eye correction may not produce the desired results in some images.
• In some rare cases, red-eye correction may be applied unnecessarily to other areas of the image.
Glamour Retouch: Enhancing Human Faces

Press the  button (playback mode) ➔ select an image ➔ MENU button ➔ Glamour retouch ➔ OK button

1 Use the multi selector ▲▼ ◄► to select the face that you want to retouch and press the OK button.
   • When only one face is detected, proceed to step 2.

2 Use ◄► to select the effect, use ▲▼ to select the effect level, and press the OK button.
   • You can simultaneously apply multiple effects.
     Adjust or check the settings for all effects before pressing the OK button.
     (Small face), (Skin softening), (Powder), (Glare reduction), (Hide eye bags), (Big eyes), (Whiten eyes), (Eye shadow), (Mascara), (Whiten teeth), (Lipstick), (Redden cheeks)
   • Press the MENU button to return to the screen for selecting a person.

3 Preview the result and press the OK button.
   • To change the settings, press ◄ to return to step 2.
   • To exit without saving the edited image, press the MENU button.
4 Select **Yes** and press the **OK** button.

- An edited copy is created.

**Notes About Glamour Retouch**

- Only one face at a time can be edited using the glamour retouch function.
- Depending upon the direction in which faces are looking, or the brightness of faces, the camera may be unable to accurately detect faces, or the glamour retouch function may not perform as expected.
- If no faces are detected, a warning is displayed and the screen returns to the playback menu.
- The glamour retouch function is available only for images captured at an ISO sensitivity of 1600 or lower, and the image size of 640 × 480 or larger.
Small Picture: Reducing the Size of an Image

Press the button (playback mode) ➔ select an image ➔ menu button ➔ Small picture ➔ ok button

1 Use the multi selector ▲▼ to select the desired copy size and press the ok button.
   • Images taken at an image mode setting of 5120×2880 are saved at a size of 640 × 360, and images taken at an image mode setting of 3864×3864 are saved at 480 × 480. Press the ok button to proceed to step 2.

2 Select Yes and press the ok button.
   • An edited copy is created (compression ratio of approximately 1:16).
Crop: Creating a Cropped Copy

1 Move the zoom control to enlarge the image (63).

2 Refine copy composition and press the MENU button.
   - Move the zoom control toward T ( ) or W ( ) to adjust the zoom ratio. Set a zoom ratio at which is displayed.
   - Use the multi selector ▲▼◄► to scroll the image so that only the portion to be copied is visible in the monitor.

3 Select Yes and press the OK button.
   - An edited copy is created.

Image Size
Copies created with the small picture function or cropped to a size of 320 × 240 or smaller are displayed at a small size on the playback screen and cannot be cropped.

Cropping the Image in Its Current “Tall” Orientation
Use the Rotate image option (52) to rotate the image so that it is displayed in landscape orientation. After cropping the image, rotate the cropped image back to “tall” orientation.
1 Turn off the camera and connect it to the TV.
   - Connect the yellow plug to the video-in jack and the white plug to the audio-in jack on the TV.
   - Make sure that the plugs are properly oriented. Do not insert or remove the plugs at an angle when connecting or disconnecting them.

2 Tune the television to the video channel.
   - See the documentation provided with your television for details.

3 Hold down the button to turn on the camera.
   - Images are displayed on the TV.
   - The camera monitor does not turn on.

If Images Are not Displayed on the TV
Make sure that Video mode (70) in the setup menu conforms to the standard used by your TV.
Users of PictBridge-compatible printers can connect the camera directly to the printer and print images without using a computer.

1. Take images.

2. Connect to printer (E21).

3. Select images for printing and number of copies using Print order option (E45).

4. Print images one at a time (E23).

5. Print multiple images (E25).

6. When printing is complete, turn the camera off and disconnect USB cable.
Connecting the Camera to a Printer

1 Turn off the camera.

2 Turn on the printer.
   - Check printer settings.

3 Connect the camera to the printer using the USB cable.
   - Make sure that the plugs are properly oriented. Do not insert or remove the plugs at an angle when connecting or disconnecting them.
4 The camera is automatically turned on.

- The PictBridge startup screen (①) is displayed in the camera monitor, followed by the Print selection screen (②).

If the PictBridge Startup Screen Is not Displayed

When Auto is selected for Charge by computer (71), it may be impossible to print images with direct connection of the camera to some printers. If the PictBridge startup screen is not displayed after the camera is turned on, turn the camera off and disconnect the USB cable. Set Charge by computer to Off and reconnect the camera to the printer.
Printing Images One at a Time

1. Use the multi selector to select the desired image and press the OK button.
   - Move the zoom control toward W (셔터) to switch to thumbnail playback or T (셔터) to switch to full-frame playback.

2. Use ▲▼ to select Copies and press the OK button.

3. Select the desired number of copies (up to nine) and press the OK button.
4 Select **Paper size** and press the **OK** button.

5 Select the desired paper size and press the **OK** button.
   - To apply the paper size setting configured on the printer, select **Default** in the paper size option.
   - The paper size options available on the camera vary depending on the printer that you use.

6 Select **Start print** and press the **OK** button.
   - Printing starts.
   - To cancel printing, press the **OK** button.
Printing Multiple Images

1. When the **Print selection** screen is displayed, press the **MENU** button.

2. Use the multi selector ▲▼ to select **Paper size** and press the **OK** button.
   - To exit the print menu, press the **MENU** button.

3. Select the desired paper size and press the **OK** button.
   - To apply the paper size setting configured on the printer, select **Default** in the paper size option.
   - The paper size options available on the camera vary depending on the printer that you use.
4 Select **Print selection**, **Print all images**, or **DPOF printing** and press the OK button.

**Print selection**

Select images (up to 99) and the number of copies (up to nine) of each.

- Use the multi selector  
  
  to select images, and use  
  
  to specify the number of copies to be printed.
- Images selected for printing are indicated by  
  
  and the numeral indicating the number of copies to be printed. If no copies have been specified for images, the selection is canceled.
- Move the zoom control toward  
  
  to switch to full-frame playback or  
  
  to switch to thumbnail playback.
- Press the OK button when setting is complete.
- When the screen shown on the right is displayed, select **Start print** and press the OK button to start printing.
Print all images

One copy each of all images saved in the internal memory, or on the memory card, is printed.

- When the screen shown on the right is displayed, select **Start print** and press the **OK** button to start printing.

DPOF printing

Print images for which a print order was created using the **Print order** option (E45).

- When the screen shown on the right is displayed, select **Start print** and press the **OK** button to start printing.

To view the current print order, select **View images** and press the **OK** button. To print images, press the **OK** button again.
The Shooting Menu (for 📸 (Auto) Mode)

Image Mode (Image Size and Quality)

Enter shooting mode ➔ MENU button ➔ Image mode ➔ OK button

Select the combination of image size and compression ratio that is used when saving images. The higher the image mode setting, the larger the size at which it can be printed, and the lower the compression ratio, the higher the quality of the images, but the number of images that can be saved is reduced.

<table>
<thead>
<tr>
<th>Option*</th>
<th>Compression ratio</th>
<th>Aspect ratio (horizontal to vertical)</th>
</tr>
</thead>
<tbody>
<tr>
<td>20M* 5152×3864★</td>
<td>Approx. 1/4</td>
<td>4:3</td>
</tr>
<tr>
<td>20M 5152×3864 (default setting)</td>
<td>Approx. 1/8</td>
<td>4:3</td>
</tr>
<tr>
<td>10M 3648×2736</td>
<td>Approx. 1/8</td>
<td>4:3</td>
</tr>
<tr>
<td>4M 2272×1704</td>
<td>Approx. 1/8</td>
<td>4:3</td>
</tr>
<tr>
<td>2M 1600×1200</td>
<td>Approx. 1/8</td>
<td>4:3</td>
</tr>
<tr>
<td>VGA 640×480</td>
<td>Approx. 1/8</td>
<td>4:3</td>
</tr>
<tr>
<td>16:9 5120×2880</td>
<td>Approx. 1/8</td>
<td>16:9</td>
</tr>
<tr>
<td>1:1 3864×3864</td>
<td>Approx. 1/8</td>
<td>1:1</td>
</tr>
</tbody>
</table>

* The total number of pixels captured, and the number of pixels captured horizontally and vertically.
Example: **20M 5152×3864** = Approx. 20 megapixels, 5152 × 3864 pixels
**Image Mode**

- The image mode setting can also be changed in shooting modes other than auto. The changed setting is also applied to other shooting modes.
- Some functions cannot be used with other menu options (56).

**Number of Images That Can Be Saved**

- The approximate number of images that can be saved can be checked in the monitor when shooting (20).
- Note that due to JPEG compression, the number of images that can be saved may vary greatly depending on the image content, even when using memory cards with the same capacity and the same image mode setting. In addition, the number of images that can be saved may vary depending on the make of the memory card.
- If the number of exposures remaining is 10,000 or more, the number of exposures remaining display shows “9999”.

**Printing Images at 1:1 Aspect Ratio**

Change the printer setting to “Border” when printing images at a 1:1 aspect ratio. Some printers may not be able to print images at a 1:1 aspect ratio.
White Balance (Adjusting Hue)

Select 📷 (auto) mode ➔ MENU button ➔ White balance ➔ OK button

Adjust white balance to suit the light source or weather conditions in order to make the colors in images match what you see with your eyes.

- Use Auto under most conditions. Change the setting when you want to adjust the hue of the image you are taking.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO Auto (default setting)</td>
<td>White balance is automatically adjusted to suit lighting conditions.</td>
</tr>
<tr>
<td>PRE Preset manual</td>
<td>Use when the desired result is not achieved with Auto, Incandescent, etc. (☞31).</td>
</tr>
<tr>
<td>☀ Daylight</td>
<td>Use under direct sunlight.</td>
</tr>
<tr>
<td>☀️ Incandescent</td>
<td>Use under incandescent lighting.</td>
</tr>
<tr>
<td>🌃 Fluorescent</td>
<td>Use under fluorescent lighting.</td>
</tr>
<tr>
<td>☁️ Cloudy</td>
<td>Use when taking images under overcast skies.</td>
</tr>
<tr>
<td>⚡ Flash</td>
<td>Use with the flash.</td>
</tr>
</tbody>
</table>

☑️ Notes About White Balance

- Set the flash to ☀️ (off) when white balance is set to any setting other than Auto and Flash (☞45).
- Some functions cannot be used with other menu options (☞56).
Using Preset Manual

Use the procedure below to measure the white balance value under the lighting used during shooting.

1. Place a white or gray reference object under the lighting that will be used during shooting.

2. Use the multi selector ▲▼ to select **Preset manual** in the **White balance** menu, and press the OK button.
   - The camera zooms in to the position for measuring white balance.

3. Select **Measure**.
   - To apply the last measured value, select **Cancel** and press the OK button.

4. Frame the reference object in the measuring window.
5 Press the OK button to measure the value.
   • The shutter is released and measurement is complete. No image is saved.

✓ Notes About Preset Manual
A value for flash lighting cannot be measured with Preset manual. When shooting using the flash, set White balance to Auto or Flash.
## Continuous Shooting

Select 📷 (auto) mode ➔ MENU button ➔ Continuous ➔ OK button

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single (default setting)</td>
<td>One image is taken each time the shutter-release button is pressed.</td>
</tr>
<tr>
<td>Continuous</td>
<td>While the shutter-release button is held all the way down, images are captured continuously.</td>
</tr>
<tr>
<td></td>
<td>• The frame rate for continuous shooting is about 1.1 fps and the maximum number of continuous shots is about 6 (when image mode is set to 5152×3864).</td>
</tr>
<tr>
<td>BSS  (Best Shot Selector)</td>
<td>While the shutter-release button is held all the way down, the camera captures a series of up to ten images and automatically saves the sharpest image. Use when shooting a stationary subject in a place where flash photography is prohibited and camera shake is likely to occur.</td>
</tr>
<tr>
<td>Multi-shot 16</td>
<td>Each time the shutter-release button is pressed all the way down, the camera captures a series of 16 images and saves it as a single image.</td>
</tr>
<tr>
<td></td>
<td>• The frame rate for continuous shooting is about 30 fps.</td>
</tr>
<tr>
<td></td>
<td>• Image mode is fixed at 5m (image size: 2560 × 1920 pixels).</td>
</tr>
<tr>
<td></td>
<td>• Digital zoom is not available.</td>
</tr>
</tbody>
</table>
**Notes About Continuous Shooting**

- When a setting other than **Single** is selected, the flash cannot be used. Focus, exposure, and white balance are fixed at the values determined with the first image in each series.
- It may take some time to save the images after shooting.
- Some functions cannot be used with other menu options (56).

**Notes About Multi-shot 16**

Smear (3) visible in the monitor when shooting with **Multi-shot 16** enabled will be recorded with images. Avoiding bright objects such as the sun, reflections of the sun, and electric lights when shooting with **Multi-shot 16** enabled is recommended.
ISO Sensitivity

Select (auto) mode ➔ MENU button ➔ ISO sensitivity ➔ OK button

Higher ISO sensitivity allows darker subjects to be captured. Additionally, even with subjects of similar brightness, images can be taken at faster shutter speeds, and blurring caused by camera shake and subject movement can be reduced.
- When higher ISO sensitivity is set, images may contain noise.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AUTO Auto (default setting)</td>
<td>Sensitivity is automatically selected from the range of ISO 80 to 1600.</td>
</tr>
<tr>
<td>ISO AUTO Fixed range auto</td>
<td>Select the range in which the camera automatically adjusts ISO sensitivity, from ISO 80-400 or ISO 80-800.</td>
</tr>
<tr>
<td>80, 100, 200, 400, 800, 1600, 3200</td>
<td>Sensitivity is locked at the specified value.</td>
</tr>
</tbody>
</table>

Notes About ISO Sensitivity
Some functions cannot be used with other menu options (56).

Notes About ISO 3200
When ISO sensitivity is set to 3200, the available Image mode settings are limited to 4M 2272x1704, 2M 1600x1200, and VGA 640x480. is displayed next to the ISO sensitivity indicator in the bottom left of the monitor.

ISO Sensitivity Display on the Shooting Screen
- When Auto is selected, ISO is displayed if the ISO sensitivity automatically increases.
- When Fixed range auto is selected, the maximum value for ISO sensitivity is displayed.
Color Options

Select 📸 (auto) mode ➔ MENU button ➔ Color options ➔ ☑️ button

Make colors more vivid or save images in monochrome.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🌐 Standard color (default setting)</td>
<td>Use for images exhibiting natural color.</td>
</tr>
<tr>
<td>🌐 VI Vivid color</td>
<td>Use to achieve a vivid, “photoprint” effect.</td>
</tr>
<tr>
<td>🌐 BW Black-and-white</td>
<td>Save images in black-and-white.</td>
</tr>
<tr>
<td>🌐 SE Sepia</td>
<td>Save images in sepia tones.</td>
</tr>
<tr>
<td>🌐 C Cyanotype</td>
<td>Save images in cyan-blue monochrome.</td>
</tr>
</tbody>
</table>

✅ Notes About Color Options

Some functions cannot be used with other menu options (56).
**AF Area Mode**

Select 📷 (auto) mode ➔ MENU button ➔ AF area mode ➔ OK button

Use this option to determine how the camera selects the focus area for autofocus.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>

Focus area
Notes About AF Area Mode

- When digital zoom is in effect, the camera focuses in the center of the frame regardless of the AF area mode setting.
- Some functions cannot be used with other menu options (56).

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ Target finding AF (default setting) ]</td>
<td>When the camera detects the main subject, it focuses on that subject. See “Using Target Finding AF” (60) for more information.</td>
</tr>
</tbody>
</table>
Using Subject Tracking

1 Register a subject.
   - Align the subject that you want to track with the border in the center of the monitor and press the OK button.
   - When the subject is registered, a yellow border (focus area) is displayed around that subject and the camera begins tracking that subject.
   - If the subject cannot be registered, the border glows red. Change the composition and try registering the subject again.
   - To cancel subject registration, press the OK button.
   - If the camera can no longer track the registered subject, the focus area disappears. Register the subject again.

2 Press the shutter-release button fully to take the picture.
   - If the shutter-release button is pressed while the focus area is not displayed, the camera focuses on the subject in the center of the frame.

☑️ Notes About Subject Tracking
   - If you perform operations such as zooming while the camera is tracking the subject, the registration is canceled.
   - Subject tracking may not be possible in certain shooting conditions.

Select (auto) mode ➔ MENU button ➔ AF area mode ➔ OK button ➔ Subject tracking ➔ OK button ➔ MENU button
AutoFocus Mode

Select [ ] (auto) mode ➔ [MENU] button ➔ Autofocus mode ➔ [OK] button

Select how the camera focuses when shooting still images.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>

</tbody>
</table>

✅ Notes About Smile Timer

Some functions cannot be used with other menu options (56).
Blink Proof

Enter shooting mode ➔ (shooting mode) button ➔ 😃 Smart portrait ➔ ☑️ button ➔ MENU button ➔ Blink proof ➔ ☑️ button

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| ☑️ On         | The camera automatically releases the shutter twice with every shot and saves one image in which the subject’s eyes are open.  
• If the camera saved an image in which the subject’s eyes may have been closed, the dialog shown on the right is displayed for a few seconds.  
• The flash cannot be used. |
| Off (default setting) | Turns the blink proof off.                                                     |

⚠️ Notes About Blink Proof

Some functions cannot be used with other menu options (56).
Print Order (Creating a DPOF Print Order)

Press the button (playback mode) ➔ MENU button ➔ Print order ➔ button

If you configure print order settings in advance, you can use them with the printing methods listed below.
- Taking the memory card to a digital photo lab that supports DPOF (Digital Print Order Format) printing.
- Inserting the memory card into a DPOF-compatible printer’s card slot.
- Connecting the camera to a PictBridge-compatible printer (20).

1. Use the multi selector ▲▼ to select Select images and press the button.
   - In favorite pictures, auto sort, or list by date mode, the screen shown on the right is not displayed. Proceed to step 2.

• See “Editing Images (Still Images)” (11) for information about image editing features.
• See “Favorite Pictures Mode” (5) for information about Favorite pictures and Remove from favorites.
2 Select images (up to 99) and the number of copies (up to nine) of each.
   - Use the multi selector ◀▶ to select images, and use ▲▼ to specify the number of copies to be printed.
   - Images selected for printing are indicated by □ and the numeral indicating the number of copies to be printed. If no copies have been specified for images, the selection is canceled.
   - Move the zoom control toward T (◉) to switch to full-frame playback or W (◉) to switch to thumbnail playback.
   - Press the OK button when setting is complete.

3 Select whether or not to print shooting date and shooting information.
   - Select Date and press the OK button to print the shooting date on all images.
   - Select Info and press the OK button to print the shutter speed and aperture value on all images.
   - Lastly, select Done and press the OK button to complete the print order.
Notes About Print Order

When a print order is created in favorite pictures mode, auto sort mode, or list by date mode, the screen shown below is displayed if images other than those in the selected album, category, or shooting date have been marked for printing.

- **Yes**: Does not remove print markings from other images, and adds the current print order settings.
- **No**: Removes print markings from all other images, and uses only the current print order settings.

If the total number of the images in the print order exceeds 99 when the new settings are applied, the screen shown below is displayed.

- **Yes**: Removes print markings from all other images, and uses only the current print order settings.
- **Cancel**: Does not remove print markings from other images, and cancels the current print order settings.
Notes About Shooting Date and Shooting Information for Print Order

- Some printers may not be able to print the shooting date and shooting information.
- Shooting information is not printed when the camera is connected to a printer.
- The Date and Info settings are reset each time the Print order option is displayed.
- The shooting date is the date that was set on the camera when the image was captured.
- For images taken with the Print date option enabled, only the date and time imprinted at the time of shooting are printed, even if the Print order date option is enabled for the images.

Canceling Existing Print Order

Select Delete print order in step 1 of “Print Order (Creating a DPOF Print Order)” (45).

More Information

See “Printing Images at 1:1 Aspect Ratio” (29) for more information.
Slide Show

Press the [button (playback mode) ➤ MENU button ➤ Slide show ➤ OK button

Play back images one by one in an automated “slide show.” When movie files are played back in the slide show, only the first frame of each movie is displayed.

1 Use the multi selector ▲▼ to select Start and press the OK button.
   • The slide show begins.
   • To change the interval between images, select Frame intvl, press the OK button, and specify the desired interval time before selecting Start.
   • To repeat the slide show automatically, select Loop and press the OK button before selecting Start.
   • The maximum playback time is up to about 30 minutes even if Loop is enabled.

2 End or restart the slide show.
   • The screen shown on the right is displayed after the slide show ends or is paused. To exit the show, select [ and then press the OK button. To resume the slide show, select [ and then press the OK button.

Operations During Playback
   • Use ◄► to display the previous/next image. Press and hold to rewind/fast forward.
   • Press the OK button to pause or end the slide show.
Protect

Press the \( \) button (playback mode) \( \rightarrow \) MENU button \( \rightarrow \) Protect \( \rightarrow \) OK button

The camera protects selected images from accidental deletion. Select images to protect or cancel protection for previously protected images from the image selection screen (51). Note that formatting the camera’s internal memory or the memory card permanently deletes protected files (69).
The Image Selection Screen

When an image selection screen such as the one shown on the right is displayed while operating the camera, follow the procedures described below to select the images.

1. **Use the multi selector ◀► to select an image.**
   - Move the zoom control (1) toward T (事关) to switch to full-frame playback or W (事关) to switch to thumbnail playback.
   - Only one image can be selected for Rotate image and Welcome screen. Proceed to step 3.

2. **Use ▲▼ to select or deselect (or to specify the number of copies).**
   - When an image is selected, an icon is displayed below the image. Repeat steps 1 and 2 to select additional images.

3. **Press the OK button to apply image selection.**
   - When Selected images is selected, a confirmation dialog is displayed. Follow the instructions displayed in the monitor.
**Rotate Image**

Press the  button (playback mode) ➔ **MENU** button ➔ Rotate image ➔  button

Specify the orientation in which saved images are displayed during playback. Still images can be rotated 90 degrees clockwise or 90 degrees counterclockwise.

Select an image from the image selection screen (51). When the Rotate image screen is displayed, press the multi selector  to rotate the image 90 degrees.

Press the  button to finalize display orientation, and save orientation information with the image.
Voice Memo

Press the ➤ button (playback mode) ➔ select an image ➔ MENU button ➔ Voice memo ➔ OK button

Voice memos can be recorded and attached to images.

Recording Voice Memos

- Press and hold the OK button to record (up to about 20 seconds).
- Do not touch the microphone.
- During recording, REC and ➤ flash in the monitor.
- The voice memo playback screen is displayed after recording ends. Press the OK button to play back the voice memo.
- Delete the current voice memo before recording a new voice memo (54).
- ➤ is displayed for images with a voice memo when in full-frame playback mode.

Playing Voice Memos

Select an image with ➤ displayed before pressing the MENU button.
- Press the OK button to play the voice memo. Press the button again to stop playback.
- Move the zoom control during playback to adjust playback volume.
Deleting Voice Memos

Press the button while the screen described in “Playing Voice Memos” (53) is displayed.

When the confirmation dialog is displayed, use the multi selector to select Yes and press the button.

- To delete a voice memo for a protected image, the Protect setting must first be disabled.

Copy (Copy Between Internal Memory and Memory Card)

Press the button (playback mode) ➔ MENU button ➔ Copy ➔ button

Copy images between the internal memory and a memory card.

1. Use the multi selector to select a destination option to which images are copied and press the button.
2 Select a copy option and press the OK button.
   - If you choose the Selected images option, use the image selection screen to specify images (51).

☑ Notes About Copying Images
   - Only files in formats that this camera can record can be copied.
   - Operation is not guaranteed with images captured with another make of camera or that have been modified on a computer.
   - The Print order (45) settings configured for images are not copied.
   - Copied images or movies cannot be displayed in auto sort mode (9).
   - If an image added to an album (5) is copied, the copied image is not added to the album.

💡 Copying to a Memory Card That Contains No Images
When the camera is switched to playback mode, Memory contains no images. is displayed. Press the MENU button to select Copy.
The Movie Menu

Movie Options

Select the desired movie option to record.
- Memory cards (Class 6 or higher) are recommended for recording movies (page 20).

<table>
<thead>
<tr>
<th>Option (Image size/Frame rate)</th>
<th>Image size</th>
<th>Aspect ratio (horizontal to vertical)</th>
</tr>
</thead>
<tbody>
<tr>
<td>720p 720/30p/720/25p (default setting)</td>
<td>1280×720</td>
<td>16:9</td>
</tr>
<tr>
<td>480p 480/30p/480/25p</td>
<td>640×480</td>
<td>4:3</td>
</tr>
<tr>
<td>240p 240/30p/240/25p</td>
<td>320×240</td>
<td>4:3</td>
</tr>
</tbody>
</table>

1 The items and frame rate that can be set vary depending on the Video mode setting in the setup menu (page 70).
2 When recording in the internal memory, the default setting is 480p 480/30p/480/25p, and 720p 720/30p/720/25p cannot be selected.
## Autofocus Mode

Set how the camera focuses in movie mode.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AF-S Single AF</strong></td>
<td>Focus is locked when the 🎥 (movie-record) button is pressed to start recording. Select this option when the distance between the camera and subject will remain fairly consistent during recording.</td>
</tr>
<tr>
<td><strong>AF-F Full-time AF</strong></td>
<td>Camera focuses continuously during movie recording. Select this option when the distance between the camera and subject will change significantly during recording. Use of <strong>Single AF</strong> is recommended to prevent the sound of the camera focusing from interfering with recording.</td>
</tr>
</tbody>
</table>
Movie VR

Select the vibration reduction setting used when recording movies.
Select **Off** when using a tripod to stabilize the camera during shooting.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On (hybrid) <em>(default setting)</em></td>
<td>Performs optical compensation for camera shake using lens shift VR and simultaneously performs electronic VR using image processing. The angle of view (i.e., the area visible in the frame) becomes narrower.</td>
</tr>
<tr>
<td>On</td>
<td>Performs compensation for camera shake using lens shift VR.</td>
</tr>
<tr>
<td>Off</td>
<td>Compensation is not performed.</td>
</tr>
</tbody>
</table>

**Notes About Movie VR**

The effects of camera shake may not be completely eliminated in some situations.

---

**Wind Noise Reduction**

Enter shooting mode ➔ **MENU** button ➔ 🎵 menu icon ➔ Wind noise reduction ➔ **OK** button

Set whether or not to reduce wind noise during movie recording.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🎵 On</td>
<td>Reduces the sound produced when wind passes over the microphone. Other sounds may become difficult to hear during playback.</td>
</tr>
<tr>
<td>Off (default setting)</td>
<td>Wind noise reduction is not enabled.</td>
</tr>
</tbody>
</table>
Welcome Screen

Configure the welcome screen that is displayed when you turn on the camera.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>None (default setting)</td>
<td>Does not display the welcome screen.</td>
</tr>
<tr>
<td>COOLPIX</td>
<td>Displays a welcome screen with the COOLPIX logo.</td>
</tr>
<tr>
<td>Select an image</td>
<td>Displays an image selected for the welcome screen.</td>
</tr>
<tr>
<td></td>
<td>• The image selection screen is displayed. Select an image (51) and press the OK button.</td>
</tr>
<tr>
<td></td>
<td>• Because a copy of the selected image is saved in the camera, it will be displayed when the camera is turned on, even if the original image is deleted.</td>
</tr>
<tr>
<td></td>
<td>• An image cannot be selected if its aspect ratio is different from that of the screen, or if the image size is extremely small after the small picture or crop function is applied.</td>
</tr>
</tbody>
</table>
Time Zone and Date

Set the camera clock.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| Date and time| • Select a field: Press the multi selector (changes between D, M, Y, hour, and minute).  
  • Edit the date and time: Press ▲▼.  
  • Apply the setting: Select the minute setting and press the OK button. |
| Date format  | Select Year/Month/Day, Month/Day/Year, or Day/Month/Year. |
| Time zone    | Set time zone and daylight saving time.  
  • When Travel destination (_travel) is set after having set the home time zone (home), the time difference between the travel destination and the home time zone is automatically calculated, and the date and time are saved for the selected region. |

Setting the Time Zone

1. Use the multi selector ▲▼ to select Time zone and press the OK button.
2 Select Home time zone or Travel destination and press the OK button.
   - The date and time displayed in the monitor changes depending on whether the home time zone or travel destination is selected.

3 Press ►.

4 Use ◀ to select the time zone.
   - Press ▲ to enable daylight saving time function, and ☀ is displayed. Press ▼ to disable the daylight saving time function.
   - Press the OK button to apply the time zone.
   - If the correct time is not displayed for the home or travel destination time zone setting, set the appropriate time in Date and time.
Monitor Settings

Press the **MENU** button → **menu icon** → Monitor settings → **OK** button

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Photo info</td>
<td>Set whether or not to display information in the monitor.</td>
</tr>
</tbody>
</table>
| Image review    | This setting determines whether or not the captured image is displayed immediately after shooting.  
|                 | • Default setting: **On**                                                   |
| Brightness      | Select from five settings.                                                  |
|                 | • Default setting: **3**                                                    |

### Photo Info

<table>
<thead>
<tr>
<th>Show info</th>
<th><img src="image1.png" alt="Shooting mode" /></th>
<th><img src="image2.png" alt="Playback mode" /></th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto info (default setting)</td>
<td><img src="image3.png" alt="Auto info" /></td>

</tr>
<tr>
<td>Hide info</td>
<td><img src="image5.png" alt="Hide info" /></td>
<td><img src="image6.png" alt="Hide info" /></td>
</tr>
</tbody>
</table>

Current settings and operation guide are displayed as in **Show info**. If no operations are performed for a few seconds, the information is hidden as in **Hide info**. Information is displayed again when the next operation is performed.
### Notes About Monitor Settings

When **Quick effects** (41) is set to **On** while shooting still images, the captured image is displayed after shooting, regardless of the **Image review** setting.

<table>
<thead>
<tr>
<th>Framing grid+auto info</th>
<th>In addition to information shown with <strong>Auto info</strong>, a framing grid is displayed to help frame images. The framing grid is not displayed when recording movies.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Movie frame+auto info</td>
<td>In addition to information shown with <strong>Auto info</strong>, a frame is displayed before recording begins that represents the area that will be captured when recording movies. The frame is not displayed when the shutter release button is pressed halfway or while recording.</td>
</tr>
<tr>
<td></td>
<td>The current settings or operation guide is displayed, as in <strong>Auto info</strong>.</td>
</tr>
<tr>
<td></td>
<td>The current settings or operation guide is displayed, as in <strong>Auto info</strong>.</td>
</tr>
</tbody>
</table>
Print Date (Imprinting Date and Time)

Press the **MENU** button ➔ **menu** icon ➔ **Print date** ➔ **OK** button

The shooting date and time can be imprinted on the images when shooting, allowing the information to be printed even from printers that do not support date printing (E48).

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DATE</strong> Date</td>
<td>Date is imprinted on images.</td>
</tr>
<tr>
<td><strong>DATE+</strong> Date and time</td>
<td>Date and time are imprinted on images.</td>
</tr>
<tr>
<td>Off (default setting)</td>
<td>Date and time are not imprinted on images.</td>
</tr>
</tbody>
</table>

**Notes About Print Date**

- Imprinted dates form a permanent part of image data and cannot be deleted. The date and time cannot be imprinted on images after they have been captured.
- The date and time cannot be imprinted in the following situations:
  - When using **Panorama assist** scene mode
  - When shooting movies
- The imprinted date and time may be difficult to read when using a small image size.
Photo VR

Select the vibration reduction setting used when shooting still images. Select **Off** when using a tripod to stabilize the camera during shooting.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On (default setting)</td>
<td>Performs compensation for camera shake.</td>
</tr>
<tr>
<td>Off</td>
<td>Compensation is not performed.</td>
</tr>
</tbody>
</table>

**Notes About Photo VR**

- After turning on the camera or after switching from playback mode to shooting mode, wait for the shooting mode screen to be displayed completely before taking images.
- Images displayed in the camera monitor immediately after shooting may be displayed blurry.
- The effects of camera shake may not be completely eliminated in some situations.
## Motion Detection

Enable motion detection to reduce the effects of subject movement and camera shake when shooting still images.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| ![Auto](default setting) | Motion detection is enabled with some shooting modes or settings, when ![ is displayed on the shooting screen. When the camera detects subject movement or camera shake, ![ turns green, and the ISO sensitivity and shutter speed are automatically increased to reduce blurring.  
- Set **ISO sensitivity** (35) to **Auto** in **(auto) mode.** |
| Off | Motion detection is disabled. |

![Notes About Motion Detection](default setting)  
- Motion detection may be unable to eliminate the effects of subject movement and camera shake in some situations.  
- Motion detection may be disabled if the subject exhibits significant movement or is too dark.  
- The images captured using motion detection may be somewhat “grainy” in appearance.
**AF Assist**

Enable or disable the AF-assist illuminator which assists autofocus operation.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AUTO</strong> Auto</td>
<td>The AF-assist illuminator automatically lights up when the subject is</td>

</tr>
<tr>
<td></td>
<td>maximum wide-angle position and about 1.5 m (4 ft 11 in.) at the maximum</td>
</tr>
<tr>
<td></td>
<td>telephoto position.</td>
</tr>
<tr>
<td></td>
<td>• Note that for some scene modes or focus areas, the AF-assist</td>
</tr>
<tr>
<td></td>
<td>illuminator may not light.</td>
</tr>
<tr>
<td>Off</td>
<td>The AF-assist illuminator does not light.</td>
</tr>
</tbody>
</table>

**Digital Zoom**

Digital zoom cannot be used in the following situations:

- When **Portrait**, **Night portrait**, or **Pet portrait** is selected in scene mode
- When smart portrait mode is selected
- When **Continuous** (33) is set to **Multi-shot 16** in **(auto) mode**
- When **AF area mode** (37) is set to **Subject tracking** in **(auto) mode**

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>On (default setting)</td>
<td>Digital zoom is enabled.</td>
</tr>
<tr>
<td>Off</td>
<td>Digital zoom is disabled.</td>
</tr>
</tbody>
</table>
Sound Settings

Press the **MENU** button \(\rightarrow\) menu icon \(\rightarrow\) Sound settings \(\rightarrow\) OK button

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Button sound** | When **On** (default setting) is selected, the camera produces one beep when operations are performed, two beeps when focus is acquired on the subject, and three beeps when an error occurs. The start-up sound is also produced.  
  • Sounds are disabled when using **Pet portrait** scene mode. |
| **Shutter sound** | When **On** (default setting) is selected, the shutter sound is produced when the shutter is released.  
  • The shutter sound is not produced when using continuous shooting mode, when recording movies, or when using **Pet portrait** scene mode. |

Auto Off

Press the **MENU** button \(\rightarrow\) menu icon \(\rightarrow\) Auto off \(\rightarrow\) OK button

Set the amount of time that elapses before the camera enters standby mode (21). You can select **30 s, 1 min** (default setting), **5 min**, or **30 min**.

Setting the Auto Off Function
The time that passes before the camera enters standby mode is fixed in the following situations:

- When a menu is displayed: 3 minutes (when auto off is set to **30 s** or **1 min**)
- When shooting using **Pet portrait auto release**: 5 minutes (when auto off is set to **30 s** or **1 min**)
- When shooting using **Smile timer**: 5 minutes (when auto off is set to **30 s** or **1 min**)
- When the AC adapter EH-62G is connected: 30 minutes
- When an audio video cable is connected: 30 minutes
Format Memory/Format Card

Press the MENU button ➔  menu icon ➔ Format memory/Format card ➔ OK button

Use this option to format the internal memory or a memory card. **Formatting the internal memory or memory cards permanently deletes all data. Data that has been deleted cannot be recovered.** Make sure to transfer important images to a computer before formatting.
- Do not turn the camera off or open the battery-chamber/memory card slot cover during formatting.

**Formatting the Internal Memory**

Remove the memory card from the camera. The **Format memory** option is displayed in the setup menu.

**Formatting a Memory Card**

Insert a memory card in the camera. The **Format card** option is displayed in the setup menu.
Language

Press the MENU button ➔ 📷 menu icon ➔ Language ➔ OK button

Select a language for display of camera menus and messages.

Video Mode

Press the MENU button ➔ 📷 menu icon ➔ Video mode ➔ OK button

Adjust settings necessary for connection to a TV.
Select from NTSC and PAL.
Both NTSC and PAL are standards for analog color television broadcasting.
- The available frame rates in Movie options (56) vary depending on the video mode setting.
Charge by Computer

Press the **MENU** button → **Menu** icon → Charge by computer → **OK** button

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AUTO</strong> Auto (default setting)</td>
<td>When the camera is connected to a computer that is running (75), the battery inserted into the camera is automatically charged using power supplied by the computer.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>The battery inserted into the camera is not charged when the camera is connected to a computer.</td>
</tr>
</tbody>
</table>

Notes About Charging with a Computer

- When connected to a computer, the camera automatically turns on and starts charging. If the camera is turned off, charging stops.
- About 3 hours are required to charge a fully exhausted battery. Charging time increases when images are transferred while the battery is charging.
- The camera turns off automatically if there is no communication with the computer for 30 minutes after the battery has finished charging.

When the Charge Lamp Quickly Flashes Green

Charging cannot be performed, possibly due to one of the reasons described below.

- The ambient temperature is not suited to charging. Charge the battery indoors with an ambient temperature of 5°C to 35°C (41°F to 95°F).
- The USB cable is not connected correctly, or the battery is faulty. Make sure the USB cable is connected correctly and replace the battery if necessary.
- The computer is in sleep mode and is not supplying power. Wake up the computer.
- The battery cannot be charged because the computer cannot supply power to the camera due to the computer’s settings or its specifications.
**Blink Warning**

Select whether or not the camera detects human subjects that have blinked using face detection (58) when shooting in the following modes:

- **SCN** (scene auto selector) mode (32)
- **Portrait**, or **Night portrait** in scene mode (33).
- **Auto** mode (when **Face priority** (37) is selected for AF area mode option)

The Blink Warning Screen

Faces detected by the blink warning are displayed inside a border. The operations described below are available.

- To enlarge the face: Move the zoom control toward **T** ( ). If more than one face is detected, use the multi selector to select the desired face.
- To switch to full-frame playback: Move the zoom control toward **W** ( ).

If you press the **OK** button, or if no operations are performed for a few seconds, the camera returns to shooting mode.

**Option** | **Description**
--- | ---
**On** | When one or more human subjects may have blinked in an image captured using face detection, the Did someone blink? screen is displayed in the monitor. Check the image and determine whether or not another image should be captured.

**Off** (default setting) | Blink warning is disabled.

**Notes About Blink Warning**

- The blink warning is disabled at continuous settings other than **Single** (33).
- The blink warning may not function properly in some shooting conditions.
Eye-Fi Upload

Press the **MENU** button ➔ **Y** menu icon ➔ Eye-Fi upload ➔ **OK** button

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>🌈 Enable (default setting)</td>
<td>Upload images created by the camera to a preselected destination.</td>
</tr>
<tr>
<td>🌐 Disable</td>
<td>Images are not uploaded.</td>
</tr>
</tbody>
</table>

☑️ Notes About Eye-Fi Cards

- Note that images will not be uploaded if signal strength is insufficient even if **Enable** is selected.
- Remove your Eye-Fi card from the camera where wireless devices are prohibited. Signals may be transmitted even if **Disable** is selected.
- Refer to the instruction manual of your Eye-Fi card for more information. In the event of malfunction, contact the card manufacturer.
- The camera can be used to turn Eye-Fi cards on and off, but may not support other Eye-Fi functions.
- The camera is not compatible with the Endless Memory function. When it is set on a computer, disable the function. If the Endless Memory function is enabled, the number of images taken may not be displayed correctly.
- Eye-Fi cards are for use only in the country of purchase. Observe all local laws concerning wireless devices.
- Leaving the setting as **Enable** will result in the battery being depleted in a shorter period of time.

📝 Eye-Fi Communication Indicator

The communication status of the Eye-Fi card in the camera can be confirmed in the monitor (P7).

- 🌈 **Eye-Fi upload** is set to **Disable**.
- 🌐 (lights): Eye-Fi upload enabled; waiting to begin upload.
- 🌐 (flashes): Eye-Fi upload enabled; uploading data.
- 🌐: Eye-Fi upload enabled but no images available for upload.
- 🌐: An error occurred. The camera cannot control the Eye-Fi card.
Reset All

Press the MENU button → menu icon → Reset all → OK button

When Reset is selected, the camera’s settings are restored to their default values.
- Some settings, such as Time zone and date or Language, are not reset.

⚠️ Resetting File Numbering

To reset file numbering to “0001”, delete all images saved in the internal memory or on the memory card (30) before selecting Reset all.

Firmware Version

Press the MENU button → menu icon → Firmware version → OK button

View the current camera firmware version.
# Error Messages

### File Names

Images, movies, or voice memos are assigned file names as follows.

<table>
<thead>
<tr>
<th>Identifier (not shown on camera monitor)</th>
<th>Extension (indicates file format)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Original still images (voice memo attachment included) and movies</td>
<td>Still images .JPG</td>
</tr>
<tr>
<td>Small copies (voice memo attachment included)</td>
<td>Movies .AVI</td>
</tr>
<tr>
<td>Cropped copies (voice memo attachment included)</td>
<td>Voice memos .WAV</td>
</tr>
<tr>
<td>Copies created using editing functions other than small picture and crop* (voice memo attachment included)</td>
<td></td>
</tr>
</tbody>
</table>

* Including images edited using the quick effects function in (auto) mode

- Voice memo file names have the same identifier and file number as the image to which the voice memo is attached.
- When using panorama assist mode, a new folder is created each time a panorama is taken, and each image in the series is saved with a sequential file number starting from “0001”.

Caring for the Product

The Camera
To ensure continued enjoyment of this Nikon product, observe the precautions described below in addition to the warnings in “For Your Safety” (viii-x) when using or storing the device.

☑ Keep Dry
The device will be damaged if immersed in water or subjected to high humidity.

☑ Do Not Drop
The product may malfunction if subjected to strong shock or vibration.

☑ Handle the Lens and All Moving Parts with Care
Do not apply force to the lens, lens cover, monitor, memory card slot, or battery chamber. These parts are easily damaged. Applying force to the lens cover could result in camera malfunction or damage to the lens. Should the monitor break, care should be taken to avoid injury caused by broken glass and to prevent the liquid crystal from the display touching the skin or entering the eyes or mouth.

☑ Do Not Point the Lens at Strong Light Sources for Extended Periods
Avoid pointing the lens at the sun or other strong light sources for extended periods when using or storing the camera. Intense light may cause deterioration of the CCD image sensor, producing a white blur effect in photographs.

☑ Keep Away from Strong Magnetic Fields
Do not use or store this device in the vicinity of equipment that generates strong electromagnetic radiation or magnetic fields. Strong static charge or the magnetic fields produced by equipment such as radio transmitters could interfere with the monitor, damage data saved on the memory card, or affect the product’s internal circuitry.
Avoid Sudden Changes in Temperature
Sudden changes in temperature, such as when entering or leaving a heated building on a cold day, can cause condensation to form inside the device. To prevent condensation, place the device in a carrying case or a plastic bag before exposing it to sudden changes in temperature.

Turn the Product Off Before Removing or Disconnecting the Power Source or Memory Card
Do not remove the battery while the product is on, or while images are being saved or deleted. Forcibly cutting power in these circumstances could result in loss of data or in damage to product memory or internal circuitry.

Notes About the Monitor
- Monitors and electronic viewfinders are constructed with extremely high precision; at least 99.99% of pixels are effective, with no more than 0.01% being missing or defective. Hence while these displays may contain pixels that are always lit (white, red, blue, or green) or always off (black), this is not a malfunction and has no effect on images recorded with the device.
- White or colored streaks may be visible when bright subjects are framed in the monitor. This phenomenon, known as “smear,” occurs when extremely bright light strikes the image sensor; it is characteristic of image sensors and does not indicate a malfunction. Smear may also take the form of partial discoloration in the monitor during shooting. It does not appear in images saved with the camera except in the cases of movies and of images saved with Multi-shot 16 selected for Continuous. When shooting in these modes, we recommend that you avoid bright subjects such as the sun, reflected sunlight, and electric lights.
- Images in the monitor may be difficult to see under bright lighting.
- The monitor is lit by an LED backlight. Should the monitor begin to dim or flicker, contact your Nikon-authorized service representative.
**The Battery**

Be sure to read and follow the warnings in “For Your Safety” (viii-x) before use.

- Check the battery level before using the camera and replace or charge the battery if necessary. Do not continue charging once the battery is fully charged as this will result in reduced battery performance. Whenever possible, carry a fully charged spare battery when taking images on important occasions.
- Do not use the battery at ambient temperatures below 0°C (32°F) or above 40°C (104°F).
- Charge the battery indoors with an ambient temperature of 5°C to 35°C (41°F to 95°F) before use.
- When charging the battery inserted into this camera using the Charging AC Adapter or a computer, the battery is not charged at battery temperatures below 0°C (32°F) or above 45°C (113°F).
- Note that the battery may become hot during use; wait for the battery to cool before charging. Failure to observe these precautions could damage the battery, impair its performance, or prevent it from charging normally.
- On cold days, the capacity of batteries tends to decrease. Be sure that the battery is fully charged before heading outside to take images in cold weather. Keep spare batteries in a warm place and exchange as necessary. Once warmed, a cold battery may recover some of its charge.
- Dirt on the battery terminals can prevent the camera from functioning. Should the battery terminals become dirty, wipe them off with a clean, dry cloth before use.
- If the battery will not be used for some time, insert it in the camera and completely exhaust it before removing it for storage. The battery should be stored in a cool location with an ambient temperature of 15°C to 25°C (59°F to 77°F). Do not store the battery in hot or extremely cold locations.
- Always remove the battery from the camera or optional battery charger when it is not being used. When inserted, minute amounts of current flow even when unused, and the battery may become excessively drained and no longer function. Turning the camera on or off while the battery is exhausted can result in reduced battery life.
- Recharge the battery at least once every six months and completely exhaust it before returning it to storage.
- After removing the battery from the camera or optional battery charger, put the battery in a plastic bag, etc. in order to insulate it and store it in a cool place.
- A marked drop in the time a fully charged battery retains its charge, when used at room temperature, indicates that the battery needs to be replaced. Purchase a new EN-EL19 battery.
Replace the battery when it no longer holds a charge. Used batteries are a valuable resource. Please recycle used batteries in accordance with local regulations.

**Charging AC Adapter**

Be sure to read and follow the warnings in “For Your Safety” (viii-x) before use.

- The Charging AC Adapter EH-70P is for use only with compatible devices. Do not use with another make or model of device.
- The EH-70P is compatible with AC 100-240 V, 50/60 Hz electrical outlets. When using in other countries, use a plug adapter (commercially available) as necessary. For more information about plug adapters, consult your travel agency.
- Do not, under any circumstances, use another make or model of AC adapter other than Charging AC Adapter EH-70P or USB-AC adapter. Failure to observe this precaution could result in overheating or in damage to the camera.

**Memory Cards**

- Use only Secure Digital memory cards. See “Approved Memory Cards” (20) for recommended memory cards.
- Be sure to follow the precautions described in the documentation included with the memory card.
- Do not put labels or stickers on memory cards.
- The first time you insert a memory card that has been used in another device into this camera, be sure to format it with this camera. We recommend formatting new memory cards with this camera before using them with this camera.
- Note that **formatting a memory card permanently deletes all images and other data on the memory card**. Be sure to make copies of any images you wish to keep before formatting the memory card.
- If the message **Card is not formatted. Format card?** is displayed when the camera is turned on, the memory card must be formatted. If there is data that you do not want to delete, select **No**. Copy the necessary data to a computer, etc. If you want to format the card, select **Yes**. The confirmation dialog will be displayed. To start formatting, press the OK button.
- Do not perform the following during formatting, while data is being written to or deleted from the memory card, or during data transfer to a computer. Failure to observe this precaution could result in the loss of data or in damage to the camera or memory card:
  - Open the battery-chamber/memory card slot cover to remove/insert the battery or memory card.
  - Turn off the camera.
  - Disconnect the AC adapter.
- Do not format the memory card using a computer.
Cleaning and Storage

Cleaning
Do not use alcohol, thinner, or other volatile chemicals.

| Lens          | Avoid touching the lens with your fingers. Remove dust or lint with a blower (typically a small device with a rubber bulb attached to one end that is pumped to produce a stream of air out the other end). To remove fingerprints or other stains that cannot be removed with a blower, wipe the lens with a soft cloth, using a spiral motion that starts at the center of them and working toward the edges. If this fails, clean the lens using a cloth lightly dampened with commercial lens cleaner. |
| Monitor       | Remove dust or lint with a blower. To remove fingerprints and other stains, clean the monitor with a soft, dry cloth, being careful not to apply pressure. |
| Body          | Use a blower to remove dust, dirt, or sand, then wipe gently with a soft, dry cloth. After using the camera at the beach or other sandy or dusty environment, wipe off any sand, dust, or salt with a dry cloth lightly dampened with fresh water and dry thoroughly. *Note that foreign matter inside the camera could cause damage not covered by the warranty.* |

Storage
Turn the camera off when not in use. Be sure that the power-on lamp is off before putting the camera away. Remove the battery if the camera will not be used for an extended period. Do not store the camera with naphtha or camphor moth balls, or in any of the following locations:
- Next to equipment that produces strong electromagnetic fields, such as televisions or radios
- Exposed to temperatures below −10°C (14°F) or above 50°C (122°F)
- Places that are poorly ventilated or subject to humidity of over 60%
To prevent mold or mildew, take the camera out of storage at least once a month. Turn the camera on and release the shutter a few times before putting the camera away again. For storing the battery, follow the precautions in “The Battery” (64) in “Caring for the Product” (62).
# Troubleshooting

If the camera fails to function as expected, check the list of common problems below before consulting your retailer or Nikon-authorized service representative.

## Power, Display, Settings Issues

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause/Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The camera is on but does not respond.</td>
<td>Wait for recording to end. If the problem persists, turn the camera off. If the camera does not turn off, remove and reinsert the battery or batteries or, if you are using an AC adapter, disconnect and reconnect the AC adapter. Note that although any data currently being recorded will be lost, data that have already been recorded will not be affected by removing or disconnecting the power source.</td>
</tr>
<tr>
<td>Battery inserted in the camera cannot be charged.</td>
<td>• Confirm all connections. • When connected to a computer, the camera may not charge for any of the reasons described below. - <strong>Off</strong> is selected for Charge by computer in the setup menu. - Battery charging stops if the camera is turned off. - Battery charging is not possible if the camera’s display language and date and time have not been set, or the date and time were reset after the camera’s clock battery was exhausted. Use the Charging AC Adapter to charge the battery. - Battery charging may stop if the computer is in sleep mode. - Depending upon the computer specifications, settings, and status, battery charging may not be possible.</td>
</tr>
<tr>
<td>The camera cannot be turned on.</td>
<td>The battery is exhausted.</td>

</table>
| Randomly spaced bright pixels (“noise”) appear in image. | The subject is dark and the shutter speed is too slow, or ISO sensitivity is too high. Noise can be reduced by:  
  • Using flash  
  • Specifying a lower ISO sensitivity setting | 45, 54, 35 |
| Randomly spaced bright pixels (“noise”) appear in movies. | When recording movies in dim lighting, the image may become somewhat “grainy” in appearance. This occurs when the ISO sensitivity increases, and it does not indicate a malfunction. |          |
| Images are too dark (underexposed).          | • The flash mode is set to (off).  
• The flash window is blocked.  
• The subject is beyond the range of the flash.  
• Adjust exposure compensation.  
• Increase ISO sensitivity.  
• The subject is backlit. Select **Backlighting** scene mode or set the flash mode setting to (fill flash). | 46, 24, 45, 50, 54, 35, 36, 46 |
| Images are too bright (overexposed).          | Adjust exposure compensation.                                                                                                         | 50        |
| Unexpected results when flash set to (auto with red-eye reduction). | When taking images with (auto with red-eye reduction) or fill flash with slow sync and red-eye reduction in **Night portrait** scene mode, the In-Camera Red Eye Fix processing may be applied to areas not affected by red-eye in rare cases. Use any scene mode other than **Night portrait**, and change the flash mode to any setting other than (auto with red-eye reduction) and try taking an image again. | 33, 46    |
### Problem | Cause/Solution
---|---
Skin tones are not softened. | • In some shooting conditions, facial skin tones may not be softened.  
• For images containing four or more faces, try using the **Skin softening** effect in **Glamour retouch** in the playback menu.

Saving images takes time. | It may take more time to save images in the following situations:  
• When the noise reduction function is in operation  
• When the flash mode is set to (auto with red-eye reduction)  
• When the skin softening function is applied while shooting

Colored circles or light streaks appear in the monitor or images. | When shooting with backlighting or when a very strong light source (such as sunlight) is in the frame, colored circles or light streaks (ghosting) may occur. Change the position of the light source, or frame the image so that the light source does not enter the frame, and try again.

Unless otherwise stated, all figures assume a fully-charged battery and an ambient temperature of 23 ±3°C (73.4 ±5.4°F) as specified by the Camera and Imaging Products Association (CIPA).

1 Battery life may vary depending on conditions of use, such as the interval between shots or the length of time that menus and images are displayed.

2 Individual movie files cannot exceed 2 GB in size or 29 minutes in length. Recording may end before this limit is reached if camera temperature becomes elevated.

- The appearance of this product and its specifications are subject to change without notice.

Approved Memory Cards

The following Secure Digital (SD) memory cards have been tested and approved for use in this camera.

- Memory cards with an SD Speed Class rating of 6 or faster are recommended for recording movies. Movie recording may stop unexpectedly when memory cards with a lower Speed Class rating are used.

<table>

1 If the memory card is used with a card reader or similar device, make sure that the device supports 2 GB cards.

2 SDHC compliant. If the memory card is used with a card reader or similar device, be sure that the device is compliant with the SDHC standard.

3 SDXC compliant. If the memory card is used with a card reader or similar device, be sure that the device is compliant with the SDXC standard.

- Contact the manufacturer for details on the above cards. We cannot guarantee camera performance when using memory cards made by other manufacturers.
