

En Procedure for Pairing for the First Time (for iOS Users)

Here, pairing refers to the setting used to connect the camera and smartphone or tablet (below, "smart device") through Bluetooth.

Parts of the Camera

Before Pairing

Camera

- Insert a microSD memory card with sufficient free space into the camera.
- Check that the battery is sufficiently charged so that the camera does not turn off during the procedure.

Smart device

- Two apps are available: "SnapBridge" and "SnapBridge 360/170". Use "SnapBridge 360/170" when pairing your device with this camera.
- **Do not pair from the Bluetooth setting screen of the smart device.**

Pairing Procedure

- 1 Check that the camera is off (the screen is off).
 - To turn off the camera, press and hold the movie button for at least three seconds.
- 2 Enable Bluetooth and Wi-Fi® on the smart device.
 - **Do not pair from the Bluetooth setting screen of the smart device.**
- 3 Install the SnapBridge 360/170 app.
- 4 Press the movie button or photo button to turn on the camera.
- 5 Press ▲ or ▼ to highlight a language, and press the OK button to select it.
- 6 Press ▼ to scroll through the screen, select **Options**, and press the OK button.

If You Select Later

If **Later** is selected, you can follow the procedure below to display the screen in step 6 and perform pairing later.

Press the OK button to display the menu → Y (setup) menu → **Camera settings** → **Network menu** → **Connect to device**.

7 Press ▼ to scroll through the screen, select **Next**, and press the **OK** button.

- The screen shown on the right is displayed on the camera.
- The status lamps flash red and green alternately while the camera is waiting to be paired.

8 Launch the SnapBridge 360/170 app on the smart device.

9 When the screen shown on the right is displayed on the smart device, tap the camera name.

- When the accessory selection screen is displayed, tap the camera name after the Bluetooth icon in top right corner of the smart device screen changes from white to grey. It may take a while before the camera name is displayed.

10 Check the authentication code.

- Confirm that the camera and smart device display the same authentication code.
- Perform the following operations on the camera and smart device at the same time.
 - On the camera, press ▼ to scroll through the screen, select **OK**, and press the **OK** button.
 - On the smart device, tap **Pairing** (the name of the button varies with the OS version).

11 Follow the on-screen instructions to complete the pairing process.

- Camera: If pairing is successful, the screen shown on the right is displayed. Press ▼ to scroll through the screen, select **Next**, and press the **OK** button. Then follow the on-screen instructions.
- Smart device: Follow the on-screen instructions.

When You Cannot Pair

Perform the following and then pair again by proceeding to "Pairing Procedure".

- Press and hold the movie button on the camera for at least three seconds to turn off the camera.
- Close the SnapBridge 360/170 app.
- Remove the Bluetooth device (registered as the camera name) in the Bluetooth setting screen of the smart device.

If the language selection dialog is not displayed when the camera is turned on, perform pairing by following the procedure described in "If You Select Later" in step 6.

To Learn More About Using the SnapBridge 360/170 App

See the online help (tap **Other** → **Info/settings** → **Instructions** in the app).
