Nikon computer software such as NX Studio is available from the Nikon Download Center. To download apps such as SnapBridge for smart devices, visit the Apple App Store® or Google Play™. For more information, see the "Reference Guide".

## Package contents

Dear Nikon custome We thank you for your purchasing this Nikon product. Should your Nikon product

NIKON CORPORATION

1-5-20, Nishioi, Shinagawa-ku, Tokyo 140-8601, Japan

require warranty service, please contact the dealer from whom it was purchased or a member of our authorized service network within the sales territory of Nikon Europe B.V. (e.g. Europe/others). See details under https://www.nikoneurope.com

In order to avoid any unnecessary inconvenience, we advise you to read the user manuals carefully before contacting the dealer or our authorized service network

Your Nikon equipment is guaranteed against any manufacturing defects for one full year from the date of original purchase. If during this period of guarantee the product proves defective due to improper material or workmanship, our authorized service network within the sales territory of Nikon Europe B.V. will, without charge for labor and parts, repair the product in the terms and conditions set as below. Nikon reserves the right (at its sole discretion) to replace or repair the product.

- 1. This warranty is only provided upon presentation of the completed warranty card and original invoice or purchase receipt indicating the date of purchase, product type and dealer's name, together with the product. Nikon reserves the right to refuse free-of-charge warranty service if the above documents cannot be presented or if the information contained in it is incomplete or illegible
- 2. This warranty will not cover:
- necessary maintenance and repair or replacement of parts due to normal wear and tear
- modifications to upgrade the product from its normal purpose as described in user manuals, without the prior written consent of Nikon.
- transport costs and all risks of transport relating directly or indirectly to the warranty of the products.
- any damage resulting from modifications or adjustments which may be made to the product, without the prior written consent of Nikon, in order to comply with local or national technical standards in force in any other country than the ones for which the product was originally designed and/or manufactured.
- **3.** The warranty will not be applicable in the case of:
- damage caused by misuse including but not limited to failure to use the product for its normal purpose or according to the user instructions on the proper use and maintenance, and to installation or use of the product inconsistent with the safety standards in force in the country where it is used.
- damage caused by accidents including but not limited to lightning, water,
- defacing, illegibility or removal of the model or serial number on the product.
- damage resulting from repairs or adjustments which have been conducted by unauthorized service organizations or persons
- defects in any system into which the product is incorporated or with which it is used.
- **4.** This service warranty does not affect the consumer's statutory rights under applicable national laws in force, nor the consumer's right against the dealer arising from their sales/purchase contract.

documentation available for download from the Nikon Download

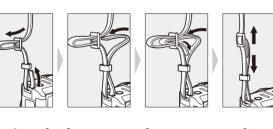

Be sure all items listed here were included with your camera.

- Camera body ☐ BS-D1 digital accessory shoe
  - ☐ AN-DC26 strap Warranty (see left)
- ☐ BF-N1 body cap
- ☐ *User's Manual* (this sheet) ☐ USB cable (featuring Type C
- ☐ EN-EL15c rechargeable Li-ion connectors at both ends)
- battery · Memory cards are sold separately.
- CFexpress (Type B), XQD, microSD, microSDHC, and microSDXC memory cards are referred to throughout this document as "memory cards". Where it is necessary to distinguish between the different types, the terms "CFexpress memory card", "XQD memory card", and "microSD memory card" may be used.

## First steps

## Attaching the strap

To attach a strap, follow the steps below.

## **Inserting the battery and memory cards**

The camera is equipped with two memory card slots: a slot that takes one CFexpress or XQD memory card (1) and card (2), for a total of two cards, one of

- Turn the camera off before inserting or removing the battery and
- Holding the memory card in the orientation shown, slide it straight into the slot until it clicks into place.
- If you are using a microSD memory card, we recommend that you insert it before inserting the battery. Using the battery to keep the orange battery latch pressed to
- one side, slide the battery into the battery chamber until the latch locks it in place.

## **II** Approved memory cards

- The camera can be used with CFexpress (Type B), XQD, microSD, microSDHC, and microSDXC memory cards.
- microSDHC and microSDXC memory cards are UHS-I compliant.

Charge the supplied EN-EL15c rechargeable Li-ion battery before use. With the battery inserted in the camera, connect the camera to the optional EH-8P AC adapter using the supplied USB cable to charge the battery.

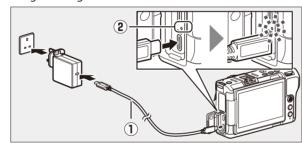

Read and follow the warnings and cautions in "For your safety" and

#### Insert the EN-EL15c into the camera.

2 After confirming that the camera is off, connect it to an optional EH-8P AC adapter using the supplied USB cable

Plug the AC adapter into a household power outlet. The battery charges while the camera is off. Keep the cable or plug straight during insertion and removal.

- The camera charge lamp (2) lights amber while charging is in progress. The lamp turns off when charging is complete. · An exhausted battery will fully charge in about 2 hours and
- 30 minutes • The shape of the plug varies with the country or region of

## ▼ Cautions: Charging

- Only EN-EL15c and EN-EL15b batteries can be charged while inserted in the camera.
- Charging errors caused by, for example, elevated camera temperatures or attempts to charge an EN-EL15a are indicated by the charge lamp flashing rapidly for about 30 seconds before turning off. After the charge lamp turns off, we recommend that you turn the camera on and confirm that the battery is charged.

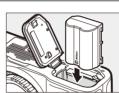

#### Tip: Charging with third-party AC adapters that are equipped with USB Type C connectors and are compliant with PD (power delivery) standards

- The camera battery can also be charged with third-party AC adapters. Use an AC adapter that complies with USB PD (power delivery) standards and is equipped with USB Type C connectors.
- Use an AC adapter that supports output of 27 W (9 V/3 A) or more. · Use a USB cable that is Type C on both ends to connect to the camera.
- · We do not guarantee that all third-party AC adapters and USB cables are able to charge the camera battery.

## Charging the battery

### Caution: Using batteries

is a NIKKOR Z 24-70mm f/4 S.

• The camera can be used with Z mount lenses. For more

· Confirm that the camera is off before attaching the lens.

Remove the camera body cap (1, 2) and rear lens cap (3, 4).

Align the mounting marks on the camera (5) and lens (6). Do not

• Be careful to prevent dust entering the camera.

touch the image sensor or lens contacts.

information on lenses, see the lens documentation available

• The lens generally used in this document for illustrative purposes

Slowly rotate the monitor without using excessive force.

Remove the front lens cap before taking pictures.

Rotate the lens as shown until it clicks into place (①).

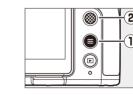

Throughout this document, the display in camera monitor during shooting is referred to as the "shooting display".

## Camera setup

Turn the camera on, choose a language, and set the clock. Before using the camera for the first time, follow the steps below to choose a language and time zone and set the clock so that the correct time and date will be recorded with any pictures you take.

- Press and hold the power switch to turn on the camera.
- To turn the camera on, firmly press the power switch.
- When the camera turns on, the power-on lamp turns on for about 5 seconds
- **2** Press and hold the  $\equiv$  button (1), and in the setup menu highlight [Language] and press the multi selector (②) right.

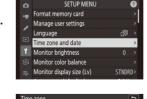

## **3** Select a language.

Press the multi selector up or down to highlight the desired language and press the center of the multi selector (the languages available vary with the country or region in which

4 Highlight [Time zone and date] and press the multi selector right.

UTC 0

## 5 Choose a time zone.

- Select [Time zone] in the [Time zone and date] display
- The display lists selected cities in the chosen zone and the difference between the time in the chosen zone and UTC.
- Highlight a time zone in the [Time zone] display and press the center of the multi selector.

- Turn daylight saving time on or off. Select [Daylight saving time] in
- the [Time zone and date] display. • Select [ON] (daylight saving time on) or [OFF] (daylight saving time
- Selecting [ON] advances the clock one hour; to undo the effect, select [OFF].

## 7 Set the clock.

- Select [Date and time] in the
- [Time zone and date] display • Press the center of the multi selector after using the multi selector to set the clock to the date and time in the selected time zone in the [Date and time] display (note that the camera uses a 24-hour clock).

## **8** Choose a date format.

- Select [Date format] in the [Time zone and date] display.
- Highlight the desired date (year, month, and day) display order and press the center of the multi selector.

Lightly press the shutter-release/ REC button halfway to exit to shooting mode.

2025. 10. 15 10:00:00

## Caring for the camera

#### ■ Long-term storage

When the camera will not be used for an extended period, remove the battery. Before removing the battery, confirm that the camera is off. Do not store the camera in locations that

#### • are poorly ventilated or subject to humidities of over 60% • are next to equipment that produces strong electromagnetic fields, such

as televisions or radios are exposed to temperatures above 50 °C (122 °F) or below -10 °C (14 °F)

The procedure varies with the part that requires cleaning. The procedures are detailed below

## Do not use alcohol, thinner, or other volatile chemicals.

**II** Cleaning

■ Camera body Use a blower to remove dust and lint, then wipe gently with a soft, dry cloth. After using the camera at the beach or seaside, wipe off sand or salt with a cloth lightly dampened in distilled water and dry the camera

**Important:** The following are not covered under warranty: damage caused by the entry of dust, sand, or other foreign matter into the camera, and

## · damage caused by using an aerosol blower too close to the camera.

These glass elements are easily damaged: remove dust and lint with a blower. If using an aerosol blower, keep the can vertical to prevent the discharge of liquid that could damage glass elements. To remove fingerprints and other stains, apply a small amount of lens cleaner to a soft

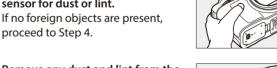

# cloth and clean with care.

Remove dust and lint with a blower. When removing fingerprints and other stains, wipe the surface lightly with a soft cloth or chamois leather. Do not apply pressure, as this could result in damage or malfunction.

## **II** Manual cleaning

Dirt or dust entering the camera when lenses are exchanged or the body cap is removed may adhere to the surface of the image sensor and affect your photographs. The sensor can be cleaned manually as described below. Note, however, that the sensor is extremely delicate and easily damaged; we recommend that manual cleaning be performed only by a Nikon-authorized service representative.

- 1 Turn the camera off and remove the lens.
- 2 Holding the camera so that light can enter, examine the image sensor for dust or lint. If no foreign objects are present,

#### 3 Remove any dust and lint from the sensor with a blower. · Do not use a blower-brush. The

bristles could damage the sensor. Dirt that cannot be removed with a blower can only be removed by Nikon-authorized service personnel. Under no

wipe the sensor.

Replace the lens or supplied body cap.

circumstances should you touch or

particles from the camera itself) may adhere to the image sensor, where it may appear in photographs taken under certain conditions. To prevent entry of foreign matter when attaching the body cap or exchanging lenses, avoid dusty environments and be sure to remove all dust and other foreign matter that may be adhering to the camera nount, lens mount, or body cap. To protect the camera when no lens is in place, be sure to replace the supplied body cap. For foreign matter adhering to the image sensor, clean the image sensor as described in "Manual cleaning", or have the sensor cleaned by authorized Nikon service personnel. Photographs affected by the presence of foreign natter on the sensor can be retouched using the clean image options

Foreign matter entering the camera when lenses or body caps are

removed or exchanged (or in rare circumstances lubricant or fine

#### available in some imaging applications. Servicing the camera and accessories

The camera is a precision device and requires regular servicing; Nikon ecommends that the camera be inspected once every one to two years, and that it be serviced once every three to five years (note that fees apply to these services).

- · Frequent inspection and servicing are particularly recommended if the camera is used professionally
- Any accessories regularly used with the camera, such as lenses or optional flash units, should be included when the camera is inspected

### **Troubleshooting**

You may be able to resolve any issues with the camera by following the steps below. Check this list before consulting your retailer or Nikon-

troubleshooting section of the Reference Guide.

**STEP 1** Common problems and solutions are listed in the

#### sert the battery and turn the camera on. STEP 2 The camera may continue to write data to the memory card after shooting. Wait at least a minute before removing the

## **Search Nikon websites**

• For support information and answers to frequently asked guestions, visit the website for your country or region (see "Nikon user support" at the top left corner of this page).

STEP 4 Consult a Nikon-authorized service representative.

Check the list of common problems.

To prevent damage to property or injury to yourself or to others, read "For your safety" in its entirety before using this product.

erve this precaution could result in injury or product malfunction. In addition, note that small parts constitute a choking hazard. Should a child swallow any part of this product, seek immediate medical attention

adapters, and USB cables designated for use with this product, do not: Damage, modify, forcibly tug or bend the cords or cables, place them under heavy objects, or expose them to heat or flame.

Failure to observe these precautions could result in fire or electric shock. Do not handle the plug when charging the product or using the AC adapter during thunderstorm

Continued use could result in fire.

## **!** CAUTION

Do not leave the lens pointed at the sun or other strong light sources.

Light focused by the lens could cause fire or damage to product's internal parts. When shooting backlit subjects, keep the sun well out of the frame. Sunlight

Turn this product off when its use is prohibited. Disable wireless features when the use of wireless equipment is prohibited. The radio-frequency emissions produced by this product could interfere with

equipment onboard aircraft or in hospitals or other medical facilities Remove the battery and disconnect the AC adapter if this product will not be used for an extended period. Failure to observe this precaution could result in fire or product malfunction.

Do not fire the flash in contact with or in close proximity to the skin or objects. Failure to observe this precaution could result in burns or fire

Do not leave the product where it will be exposed to extremely high temperatures for an extended period, such as in an enclosed automobile or in direct sunlight.

Failure to observe this precaution could result in fire or product malfunction.

Do not look at the REC lamp from short distances or for long periods. Failure to observe this precaution could have adverse effects on visio Do not transport cameras or lenses with tripods or similar accessories attached. Failure to observe this precaution could result in injury or product malfunction.

Do not touch the memory cards when a high-temperature warning is displayed in the monitor The memory cards will be hot, potentially causing burns or causing the cards to be dropped and damaged when removed. Note that the camera body and the

batteries may also be hot. Keep the product at least 5 cm (2.0 in.) from pacemakers and other medical

Medical devices in close proximity could be affected by the magnet or magnets in

## **!** DANGER (Batteries)

Do not mishandle batteries Failure to observe the following precautions could result in the batteries leaking, overheating, rupturing, or catching fire:

- Use only rechargeable batteries approved for use in this product.
- Do not expose batteries to flame or excessive heat. Do not disassemble.
- Do not short-circuit the terminals by touching them to necklaces, hairpins, or other
- Do not expose batteries or the products in which they are inserted to powerful
- physical shocks Do not step on batteries, pierce them with nails, or strike them with hammers.

Charge only as indicated.

Failure to observe this precaution could result in the batteries leaking, overheating, rupturing, or catching fire. If battery liquid comes into contact with the eyes, rinse with plenty of clean water

and seek immediate medical attention Delaying action could result in eye injuries.

Follow the instructions of airline personnel.

Batteries left unattended at high altitudes in an unpressurized environment may leak, overheat, rupture, or catch fire.

### /! WARNING (Batteries)

Keep batteries out of reach of children.

Should a child swallow a battery, seek immediate medical attention Keep batteries out of reach of household pets and other animals.

The batteries could leak, overheat, rupture, or catch fire if bitten, chewed, or otherwise damaged by animals

Do not immerse batteries in water or expose to rain Failure to observe this precaution could result in fire or product malfunction.

Immediately dry the product with a towel or similar object should it become wet. Discontinue use immediately should you notice any changes in the batteries, such as discoloration or deformation. Cease charging EN-EL15c rechargeable

batteries if they do not charge in the specified period of time. Failure to observe these precautions could result in the batteries leaking, overheating, rupturing, or catching fire.

When batteries are no longer needed, insulate the terminals with tape. Overheating, rupture, or fire may result should metal objects come into contact with

If battery liquid comes into contact with a person's skin or clothing, immediately rinse the affected area with plenty of clean water

Failure to observe this precaution could result in skin irritation

- No part of the documentation included with this product may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language
- in any form, by any means, without Nikon's prior written permission. • Nikon reserves the right to change the appearance and specifications of the hardware and software described in this documentation at any time and without prior notice.
- Nikon will not be held liable for any damages resulting from the use of this product. While every effort has been made to ensure that the information in this documentation is accurate and complete, we would appreciate it were you to bring any errors or omissions to the attention of the Nikon representative in your area (address provided separately).

## Notice concerning prohibition of copying or reproduction

Note that simply being in possession of material that has been digitally copied or reproduced by means of a scanner, digital camera, or other device may be punishable by law.

Items prohibited by law from being copied or reproduced

Do not copy or reproduce paper money, coins, securities, government bonds, or local government bonds, even if such copies or reproductions are stamped "Sample". The copying or reproduction of paper money, coins, or securities which are circulated in a foreign country is prohibited.

Unless the prior permission of the government has been obtained, the copying or reproduction of unused postage stamps or post cards issued by the government is

The copying or reproduction of stamps issued by the government and of certified

documents stipulated by law is prohibited.

Cautions on certain copies and reproductions

The government has issued cautions on copies or reproductions of securities issued by private companies (shares, bills, checks, gift certificates, etc.), commuter passes, or coupon tickets, except when a minimum of necessary copies are to be provided for business use by a company. Also, do not copy or reproduce passports issued by the government, licenses issued by public agencies and private groups, ID cards, and tickets, such as passes and meal coupons.

Comply with copyright notices

Under copyright law, photographs or recordings of copyrighted works made with the camera cannot be used without the permission of the copyright holder Exceptions apply to personal use, but note that even personal use may be restricted in the case of photographs or recordings of exhibits or live performances.

## Nikon brand accessories

This product is designed to be used with Nikon brand accessories. Nikon is not responsible for any damage caused by accidents such as malfunctions or ignition that are clearly attributable to the use of non-Nikon accessories. In these cases, repair of Nikon products is not covered under your Nikon warranty. Please understand this in advance.

EN-EL15c rechargeable Li-ion batteries are dedicated for use only with Nikon products. Nikon is not responsible for any malfunctions or accidents resulting from use with chargers or other products that are not compatible with the EN-EL15c.

• Beware of counterfeit batteries. Such batteries do not allow the camera to perform to its full potential and may cause the batteries to overheat, ignite, rupture or leak.

 An EN-EL15c rechargeable Li-ion battery bears a Nikon holographic seal indicating that it is a genuine Nikon product.

Kon Nikon Niko seal indicating that it is a genuine Nikon product.

• Memory cards may be hot after use. Observe due caution when removing memory cards from the camera.

· Do not perform the following operations during formatting or while data are being recorded, deleted, or copied to a computer or other device. Failure to observe these precautions could result in loss of data or in damage to the camera or card.

 Do not remove or insert memory cards. - Do not turn the camera off.

 Do not remove the battery. - Do not disconnect AC adapters.

Do not touch the card terminals with your fingers or metal objects. · Do not use excessive force when handling memory cards. Failure to observe this precaution could damage the card.

Do not bend or drop memory cards or subject them to strong physical shocks. Do not expose memory cards to water, heat, or direct sunlight

## • Do not format memory cards in a computer.

Before taking important pictures Before taking pictures on important occasions (such as at weddings or before taking the camera on a trip), take a test shot to ensure that the camera is functioning normally. Nikon will not be held liable for

## damages or lost profits that may result from product malfunction.

Visit these sites to keep up-to-date with the latest product information, tips, answers to frequently-asked questions (FAQs), and general advice on digital imaging and photography. Additional information may be available from the Nikon representative in your area. See the following URL for contact information: <a href="https://imaging.nikon.com/">https://imaging.nikon.com/</a>

## Caring for the camera and battery: Cautions

### ■ Cautions: Using the camera

Do not drop the camera or lens or subject them to blows. The product may malfunction if subjected to strong shocks or vibration.

## Keep drv

Keep the camera dry. Rusting of the internal mechanism caused by water inside the camera can not only be expensive to repair but can in fact cause irreparable damage.

### Avoid sudden changes in temperature

Taking the camera from a warm to a cold environment or vice versa may cause damaging condensation inside and outside the camera. Place the camera in a sealed bag or plastic case before taking it across a temperature boundary. The camera can be taken from the bag or case once it has had time to adjust to the new temperature.

#### Keep away from strong magnetic fields

Static charges or the magnetic fields produced by equipment such as radio transmitters could interfere with the monitor, corrupt data stored on the memory card, or affect the product's internal circuitry.

#### • Keep credit cards and other such magnetic storage devices away from the camera and lens

Data stored on magnetic storage devices could be corrupted.

## • Do not leave the lens pointed at the sun

Do not leave the lens pointed at the sun or other strong light source. Intense light may damage the image sensor or cause fading or "burn in". Photographs taken with the camera may exhibit a white blur effect.

## Lasers and other bright light sources

Do not direct lasers or other extremely bright light sources toward the lens, as this could damage the camera's image sensor. • Turn the product off before removing or disconnecting the power

#### Removing or disconnecting the power source while the camera is on could damage the product. Particular care should be taken not to remove or

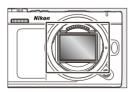

disconnect the power source while images are being recorded or deleted. When cleaning the camera body, use a blower to gently remove dust and lint, then wipe gently with a soft, dry cloth. After using the camera at the beach or seaside, wipe off any sand or salt using a cloth lightly dampened

# in fresh water and then dry the camera thoroughly.

This glass element is easily damaged: remove dust and lint with a blower. If using an aerosol blower, keep the can vertical to prevent the discharge of liquid that could damage the glass element. To remove fingerprints and other stains from the lens, apply a small amount of lens cleaner to a soft cloth and wipe the lens carefully.

## Do not touch the image sensor

Under no circumstances should you exert pressure on the image sensor, poke it with currents from a blower. These actions could scratch or otherwise damage the sensor.

## The lens contacts

Keep the lens contacts clean. Avoid touching them with your fingers.

## Store in a well-ventilated area

To prevent mold or mildew, store the camera in a dry, well-ventilated area. Do not store the camera with naphtha or camphor moth balls, next to equipment that produces strong electromagnetic, or where it will be exposed to extremely high temperatures, for example near a heater or in an enclosed vehicle on a hot day. Failure to observe these precautions could result in product malfunction.

To prevent damage caused by, for example, leaking battery fluid, remove the battery if the product will not be used for an extended period. Store the camera in a plastic bag containing a desiccant. Do not, however, store the leather camera case in a plastic bag, as this may cause the material to deteriorate. Store the battery in a cool, dry place. Note that desiccant gradually loses its capacity to absorb moisture and should be replaced at regular intervals. To prevent mold or mildew, take the camera out of storage at least once a month, insert the battery, and release the shutter a

## Notes on the monitor

· The monitor is constructed with extremely high precision; at least 99.99% of pixels are effective, with no more than 0.01% being missing or defective. Hence while the monitor may contain pixels that are always lit (white, red, blue, or green) or always off (black), this is not a malfunction. Images recorded with the device are unaffected. Your understanding is

Images in the monitor may be difficult to see in a bright light.

Do not apply pressure to the monitor. The monitor could malfunction or suffer damage. Dust or lint on the monitor can be removed with a blower. Stains can be removed by wiping the monitor lightly with a soft cloth or chamois leather. Should the monitor break, care should be taken to avoid injury from broken glass. Be careful that liquid crystal from the monitor does not touch the skin or enter the eves or mouth.

 The display may rapidly flicker on and off during burst photography. Watching the flickering display could cause you to feel unwell. Discontinue use until your condition improves.

#### Bright lights and back-lit subjects

Noise in the form of lines may in rare cases appear in pictures that include bright lights or back-lit subjects.

#### Camera shooting and playback displays

When [HLG] is selected for tone mode, the shooting and playback displays in the camera monitor may include "noise" in the form of randomly-spaced bright pixels, fog, or lines or may fail to accurately reproduce highlights and highly-saturated colors. In addition, abrupt tone discontinuities may be visible in the camera monitor when photos are displayed fullframe, although the photos themselves are unaffected. For accurate tone reproduction, use monitors, computers, operating systems, applications, and other equipment compatible with HLG.

#### Cautions: Disposing of data storage devices

Please note that deleting images or formatting memory cards or other data storage devices does not completely erase the original image data. Deleted files can sometimes be recovered from discarded storage devices using commercially available software, potentially resulting in the malicious use of personal image data. Ensuring the privacy of such data is the user's responsibility.

Before discarding a data storage device or transferring ownership to another person, erase all data using commercial deletion software, or format the device and then completely refill it with images containing no private information (for example, pictures of empty sky). Care should be taken to avoid injury when physically destroying data storage devices. Before discarding the camera or transferring ownership to another person, you should also use the [Reset all settings] item in the camera setup menu to delete network settings and other personal

#### ■ Cautions: Using batteries

## Precautions for use

• If improperly handled, batteries may rupture or leak, causing the product to corrode. Observe the following precautions when handling batteries:

- Turn the product off before replacing the battery. Batteries may be hot after extended use.
- Keep the battery terminals clean. Use only batteries approved for use in this equipment.
- Do not short or disassemble batteries or expose them to flame or excessive heat.
- When the battery is not inserted in the camera, insulate the terminals. If there is a terminal cover, attach the terminal cover to the battery. If there is no terminal cover, keep the battery separate in a plastic bag or other non-conductive container. If the battery is hot, for example immediately after use, wait for it to cool
- temperature is elevated will impair battery performance, and the battery may not charge or charge only partially. If the battery will not be used for some time, remove it from the camera and store it in a cool, dry location with an ambient temperature of 15 °C

before charging. Attempting to charge the battery while its internal

- to 25 °C (59 °F to 77 °F). Avoid hot or extremely cold locations. Batteries in long-term storage should be charged to about 50% at least once a year. Do not charge the battery to 100% before returning it to storage. A fully-exhausted battery will charge to around 50% in about half the time needed to charge it to 100%.
- Remove the battery from the camera when not in use. The camera and charger draw minute amounts of charge even when off and could draw the battery down to the point that it will no longer function. Do not use the battery at ambient temperatures below 0 °C (32 °F) or above 40 °C (104 °F). Failure to observe this precaution could damage the battery or impair its performance. Charge the battery indoors at ambient temperatures of 5 °C-35 °C (41 °F-95 °F). The battery will not charge if its
- temperature is below 0 °C (32 °F) or above 60 °C (140 °F) Capacity may be reduced and charging times increase at battery temperatures from 0 °C (32 °F) to 15 °C (59 °F) and from 45 °C (113 °F) to
- 60 °C (140 °F). Batteries in general exhibit a drop in charging capacity at low ambient temperatures. Even fresh batteries charged at temperatures under about 5 °C (41 °F) may show a temporary increase from "0" to "1" in the setup menu [Battery info] age display, but the display will return to normal once the battery has been recharged at a temperature of about 20 °C
- (68 °F) or higher. Batteries in general exhibit a drop in available capacity at low ambient temperatures. The change in capacity with temperature is reflected in the camera battery-level display. As a result, the battery display may show a drop in capacity as the temperature drops, even if the battery is fully
- Batteries may be hot after use. Observe due caution when removing batteries from the camera.

#### Charge batteries before use Charge the battery before use. The supplied battery is not fully charged at $\,$

 Ready spare batteries Before taking photographs, ready a spare battery and keep it fully charged. Depending on your location, it may be difficult to purchase replacement

## batteries on short notice.

 Have fully-charged spare batteries ready on cold days Partially-charged batteries may not function on cold days. In cold weather, charge one battery before use and keep another in a warm place, ready to be exchanged as necessary. Once warmed, a cold battery may recover some of its charge.

## Battery level

• Turning the camera on or off repeatedly when the battery is fully discharged will shorten battery life. Batteries that have been fully discharged must be charged before use.

• A marked drop in the time a fully charged battery retains its charge when used at room temperature indicates that it requires replacement. Purchase a new rechargeable battery.

### Do not attempt to charge fully-charged batteries

Continuing to charge the battery after it is fully charged can impair battery performance.

#### Recycling used batteries

Recycle rechargeable batteries in accord with local regulations, being sure to first insulate the terminals with tape.

### **Compliance information**

### ■ Notes about wireless communication function

#### Use restriction

The use of wireless devices may be prohibited in some countries or regions. Familiarize yourself with and obey all applicable local regulations. The Bluetooth transmitter in this device operates in the 2.4 GHz band.

Although one of the benefits of this product is that it allows others to freely connect for the wireless exchange of data anywhere within its range, the

- following may occur if security is not enabled • Data theft: Malicious third-parties may intercept wireless transmissions to steal user IDs, passwords, and other personal information · Unauthorized access: Unauthorized users may gain access to the network
- design of wireless networks, specialized attacks may allow unauthorized access even when security is enabled.

and alter data or perform other malicious actions. Note that due to the

- Unsecured networks: Connecting to open networks may result in unauthorized access. Use secure networks only. Configuring the settings of the security features that are normally
- included in Wi-Fi (wireless LAN) products will reduce the possibility that the problems described above will occur. You should fully understand the problems that may occur if you use a

#### product without configuring security settings. It is your responsibility to configure security settings at your own discretion before using the product.

 Precautions when exporting or carrying this product abroad This product is controlled by the United States Export Administration Regulations (EAR). The permission of the United States government is not required for export to countries other than the following, which as of this writing are subject to embargo or special controls: Cuba, Iran, North Korea,

### Sudan, and Syria (list subject to change). ■ Notice for customers in the U.S.A.

#### ■ Federal Communications Commission (FCC) statement This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful

interference, and (2) this device must accept any interference received,

including interference that may cause undesired operation. ■ FCC Class B Statement This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the

However, there is no guarantee that interference will not occur in a

- interference by one or more of the following measures: • Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver. • Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/television technician for help.

any other antenna or transmitter

FCC caution

The FCC requires the user to be notified that any changes or modifications made to this device that are not expressly approved by Nikon Corporation may void the user's authority to operate the equipment. This transmitter must not be co-located or operated in conjunction with

#### Compliance with FCC requirement 15.407(c)

Data transmission is always initiated by software, which is the passed down through the MAC, through the digital and analog baseband, and finally to the RF chip. Several special packets are initiated by the MAC.

These are the only ways the digital baseband portion will turn on the RF transmitter, which it then turns off at the end of the packet. Therefore, the transmitter will be on only while one of the aforementioned packets is being transmitted. In other words, this device automatically discontinue transmission in case of either absence of information to transmit or

operational failure Frequency Tolerance: ±20 ppm

## FCC RF exposure statement

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof. however, that these low power wireless devices are absolutely safe. Low power Wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure of low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by additional research. This product has been tested and found to comply with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. Please refer to the SAR test report that was uploaded to FCC website.

#### CAUTION

 Interface cables (when interface cables are supplied) Use only the interface cables supplied with your camera. Using other interface cables may exceed the limits of Class B Part 15 of the FCC rules. If you have lost a cable or the cable has been damaged, contact the seller

Nikon Inc., 1300 Walt Whitman Road, Melville, New York 11747-3064, U.S.A.
